

We are expanding care, close to home!

*On-site weekly-
Wednesday mornings
8am-12pm*

Jackson County Regional Health Center is proud to introduce new diagnostic radiology services. In partnership with Radiology One & Mercy Radiology of Dubuque, we're bringing advanced imaging and specialized procedures to our community without the need to travel.

Diagnostic mammograms, follow-up breast imaging, additional ultrasound exams, and biopsy procedures are done right here at your local hospital—without traveling to another city.

Local radiologists are onsite participating in your care. That means shorter wait times, quicker answers, and fewer trips for follow-up care. Your results are shared directly with your provider, so you can move forward with a care plan faster — *all while staying close to home.*
