---

Dear NU Regents,

I am a UNL alumni, and I was born and raised in Nebraska. I am disappointed and angry that you are opposing critical race theory. It is vital that places of higher learning teach history accurately. The history of our nation is one of racism and violence. Suppressing the truth and being manipulated to believe it's a political issue are tools of white supremacy. To anyone who has studied the cyclical racism in America's history, it is clear that you are on the same team as slaveholders, lynchers, and segregationists. I expect better. I expect that you would educate yourselves on the history of what White Americans have put Native and Black people through before putting this resolution to a vote. Please read *Stamped from the Beginning* or *A People's History of the United States*, or even watch *13th* on Netflix, to better understand why CRT is absolutely necessary if our country will ever live up to its promise of equality for all.

Sincerely,

Alyson Nutter  
College of Education and Human Sciences  
Class of 2007

P.S. Why are all 8 voting regents White? Should only White people be making decisions like this?
