Mr. Pillen,

I just read your comments concerning critical race theory in today's OWH.

You are a disappointment, to say the least.

You sit on a board of higher education and you want to deny the teaching of history. You need to resign from the Board of Regents immediately.

Unfortunately, you are following our current governor's and former president's playbook by stroking racial prejudices for political gain. This might very well get you elected in this very racist state, but in the process you will lose the respect of folks like me who believe integrity, character, dignity and truth matter.

Shame on you. You are an embarrassment to this state and the University of Nebraska.

We need a governor to bring this state together, not tear it apart.

Is winning an election worth selling your soul?

Tim Gross
