

AITKIN COUNTY

DUST CONTROL PROGRAM

Aitkin County is offering individuals the opportunity to obtain calcium chloride dust control treatment on an Aitkin County Highway or Unorganized Township Road.

For a fee of \$100.00, which represents half of the treatment cost, Aitkin County will apply liquid calcium chloride to a 400-foot length of the gravel road surface. This treatment, which will be completed by approximately June 11, 2021, will suppress dust under normal conditions for approximately 3 months. The remaining \$100.00 cost of the treatment will be paid by highway maintenance funds.

To participate in this program, an application and \$100.00 fee must be submitted to the Aitkin County Highway Department, 1211 Air Park Drive, Aitkin, MN 56431 by **May 19, 2021**. Applications can be obtained by calling 218-927-3741 or by visiting the website at www.co.aitkin.mn.us and following the Highway Department - Permit Applications links. A map of the segments of county highways and unorganized township roads that will be treated entirely using highway maintenance funds is also available at this website.
