

Keeping your home HIGH & DRY

HIGH & DRY foundation repair has a solution for your foundation problems. Whether it's a leaky spot in the basement, a crack in the concrete or a leaning/settling foundation wall, HIGH & DRY can provide a cost-effective, professional repair.

Tom and Cindy Ely, owners

Co-owned by husband and wife Tom and Cindy Ely, the full-service foundation repair company has fixed tens of thousands of foundations in the St. Louis metro area since 2006. The company specializes in cost-effective crack injection, wall stabilization, settling foundations and interior drain systems. HIGH & DRY's highly trained team members are not commission based, so they only recommend necessary repairs.

The family-owned company also can structurally repair cracks and bowing walls using its carbon fiber products.

"We use state-of-the-art technologies to provide a reliable and cost-effective solution for our customers' needs," Tom said. "Our goal is to provide the best quality and customer service in the industry. What makes us different? Others have sales processes for their products; we try to solve problems and then present solutions."

HIGH & DRY uses material supplies of only the highest caliber, made in the USA and keeps up with the latest technologies and techniques to ensure the best repairs available. The company offers free estimates for waterproofing and foundation repair, as well as a "Life of the Structure" transferable warranty. HIGH & DRY Foundation Repair has received the Super Service Award from Angie's List several years in a row. The company is A+ rated with the Better Business Bureau with no complaints.

"We're honest, with no intimidation," Tom said. "We are going to tell the customer what they need – and nothing more."
