

Built on teamwork, driven by service

Rooted in the St. Louis community, **UNITS® Moving and Portable Storage** is committed to providing flexible and reliable portable storage solutions throughout the Greater St. Louis region, including:

- Moving
- Remodeling
- Home Staging & Decluttering
- Restoration Projects
- Commercial Storage

Over the past five years, owners Chris and Mike Krenning have built a reputation for dependable service, responsive communication and treating customers like neighbors rather than account numbers. When customers call UNITS®, they connect with someone local who knows the area, guides them from the first call through the final delivery and is committed to making the entire experience as smooth as possible.

UNITS® combines this personalized service with innovative equipment. Their clean, all-steel, weather-resistant containers are designed to help protect belongings from moisture, dust and pests. Their innovative remote-controlled delivery system keeps containers level during loading and unloading while allowing precise placement in locations many traditional delivery systems can't reach.

Whether helping a family move, supporting a remodeling project or providing storage for local businesses, contractors and restoration companies, the UNITS® team focuses on making the process simple, flexible and stress-free.

Beyond serving customers, Chris and Mike are proud supporters of local schools, charities, nonprofits and community events. Their motto, "Moving and Storage from Neighbors You Trust," reflects a simple philosophy: treat people well, earn their trust and invest in the community you serve.
