

Making dream kitchens a reality

A home's kitchen is more than a room. It's the heart of the home and a gathering place for family and friends. From refinished cabinets to updated countertops, the experts at **Classic Kitchen Refacing** can help make your dream kitchen a reality.

Since 2015, Classic Kitchen Refacing owner Don Sheehan and his staff have worked with each individual client on designing refacing options as an affordable alternative to remodeling.

"We do cabinet refacing, custom countertops and tile backsplashes. That's our niche in the market," Don explained.

That niche has allowed Classic Kitchen Refacing to focus its services and provide customers with the

utmost excellence in both at-home service and quality materials.

"The cabinet stays in place, and we cover the sides and front with quarter-inch solid wood," Don explained. "All the exposed surfaces get covered. Then, we add new doors. You can change the color or the style of your door. If you have an arched oak door that you're tired of, we can do a new shaker door or just a totally new style."

In addition to updating aesthetics and style, Classic Kitchen Refacing also offers assets like new soft-close hinges, handles and other hardware pieces to add a finishing touch. Plus, they have the latest in quartz countertop selections.

"It'll look and act like a brand new kitchen for less than half the price of tearing everything out and replacing it," Don said.

Financing options are available with a no pressure guarantee. Call today to learn more, get a free consultation or secure a quote for your next project!
