

Add home value with landscaping, tree care

A love of trees runs deep in the Allen family. Gary and Diann Allen have owned **Allen's Tree Service, Inc.** since 1978. Gary is following in the footsteps of his father and grandfather. His son and daughter are following in his.

The Allens are proud of their family's commitment to excellence, their internationally certified arborists and their membership in leading arborist associations.

"We are one of nine tree care companies in the state of Missouri to be accredited by the Tree Care Industry Association," Gary explained.

Hiring an accredited tree care company offers peace of mind. Accredited organizations must have proper insurance, applicable licenses, reliable and ethical customer service practices and strict operating standards. Allen's Tree Service provides complete tree, lawn, landscaping and plant care. Arborists help homeowners add to the value of their homes by improving the health of their lawns, landscaping and trees. When a tree must come down, Allen's Tree Service is well-equipped for the task, including a remotely controlled, 100-foot, high-reach grapple saw.

"Our employees are well-trained to ensure proper care for selective pruning, deadwooding and limb or tree removal," Gary said. "We also provide stump grinding, 24-hour emergency storm service and bucket truck and lift services."

Using a mini aerial lift, Allen's Tree Service can safely care for trees without damaging customers' lawns. "The aerial lift weighs fewer pounds per inch than a human foot," Gary said.

Allen's Tree Service serves commercial and residential properties in St. Charles, St. Louis, Warren and Lincoln counties. Call today to learn about special discounts!
