

All your pet's needs under one roof

Celebrating its 30th anniversary in St. Peters, **Vet Stop Animal Hospital** offers everything your dog or cat needs under one roof: wellness and dental care • nutrition • microchipping • boarding and daycare • grooming • urgent care • diagnostics and laboratory • surgical services • pharmacy • end of life care.

Dr. Tammy Smith leads the veterinary team, which also includes Dr. Tami Beckeman and Dr. Erica Miller.

“On the hospital side, we have very knowledgeable veterinarians and state-of-the-art technology, testing and medication. And, at The Lodge, we have a grooming facility, daycare and boarding,” explained hospital manager Lisa Lee.

In its surgery centers, Vet Stop offers specialty surgeries that include spay, neuter and soft tissue surgery as well as different levels of dental cleanings to maintain feline and canine dental health. At the New Town location, which opened in 2023, Dr. Beckeman also diagnoses, manages and treats orthopedic conditions.

Vet Stop personnel use low-stress handling techniques when performing procedures, such as nail trims and vaccinations. If an animal is anxious, the procedure is bypassed. For feline friends, Vet Stop offers a cats-only room that is specifically designed to put felines at ease. Owners can bring their pets to the clinic during normal business hours for a Happy Visit that allows the animal to become familiar with the staff and clinic.

“Our doctors and technicians stay alert to what’s new by participating in continuing education,” Lee said. “At The Lodge, staff engagement includes planning monthly, themed events that our clients and pets enjoy.”
