

# TOP DENTISTS

## INTRODUCTION

This list is excerpted from the 2025 topDentists™ list, a database which includes listings for over 220 dentists and specialists in the Milwaukee area. The Milwaukee area list is based on thousands of detailed evaluations of dentists and professionals by their peers. The complete database is available at [www.usatopdentists.com](http://www.usatopdentists.com). For more information call 706-364-0853; write PO Box 970, Augusta, GA 30903; email [help@usatopdentists.com](mailto:help@usatopdentists.com) or visit [www.usatopdentists.com](http://www.usatopdentists.com).

## SELECTION PROCESS

"If you had a patient in need of a dentist, which dentist would you refer them to?"

This is the question we've asked thousands of dentists to help us determine who the topDentists should be. Dentists and specialists are asked to take into consideration years of experience, continuing education, manner with patients, use of new techniques and technologies and of course physical results.

The nomination pool of dentists consists of dentists listed online nationally as well as dentists listed online with their local dental societies, thus allowing virtually every dentist the opportunity to participate. Dentists are also given the opportunity to nominate other dentists that they feel should be included in our list. Respondents are asked to put aside any personal bias or political motivations and to use only their knowledge of their peer's work when evaluating the other nominees.

Voters are asked to individually evaluate the practitioners on their ballot whose work they are familiar with. Once the balloting is completed, the scores are compiled and then averaged. The numerical average required for inclusion varies depending on the average for all the nominees within the specialty and the geographic area. Borderline cases are given careful consideration by the editors. Voting characteristics and comments are taken into consideration while making decisions. Past awards

a dentist has received and status in various dental academies can play a factor in our decision.

Once the decisions have been finalized, the included dentists are checked against state dental boards for disciplinary actions to make sure they have an active license and are in good standing with the board. Then letters of congratulations are sent to all the listed dentists.

Of-course there are many fine dentists who are not included in this representative list. It is intended as a sampling of the great body of talent in the field of dentistry in the United States. A dentist's inclusion on our list is based on the subjective judgments of his or her fellow dentists. While it is true that the lists may at times disproportionately reward visibility or popularity, we remain confident that our polling methodology largely corrects for any biases and that these lists continue to represent the most reliable, accurate, and useful list of dentists available anywhere.

## DISCLAIMER

# TALK TO YOUR DENTIST ABOUT US

...and ask us about SonEndo GentleWave's groundbreaking technology providing unprecedented root canal cleaning for improved patient care.

SPECIALIST MEMBER

We are the leaders in micro-endodontics and microsurgery, utilizing the latest technology to facilitate the best possible treatment results. We are also the first endodontic practice in Wisconsin to utilize cone beam computed tomography (CBCT), which allows for three-dimensional examination of teeth requiring more complex treatment or surgical intervention.

We are pleased to announce that we now offer the GentleWave, a procedure that provides better cleaning and less-invasive treatment to the standard root canal. The GentleWave System represents an innovative, minimally invasive way of cleaning root canals using breakthrough Multisonic Ultracleaning® technology. We are always looking for advancements that will improve our ability to deliver exceptional patient care.

WE ARE PROUD TO OFFER IV SEDATION SERVICES TO ALLEVIATE ANXIETY ASSOCIATED WITH ENDODONTIC TREATMENT.

# THE EXPERT IN SMILE DESIGNS

**A smile design is a complete transformation and reconstruction of a person's smile. Smile designs are perfect for those people looking to fix cracked, chipped, yellowed, worn, crooked, or broken teeth. They are also beneficial to people suffering from TMJ issues. Smile designs are usually completed in as little as 3 visits!**

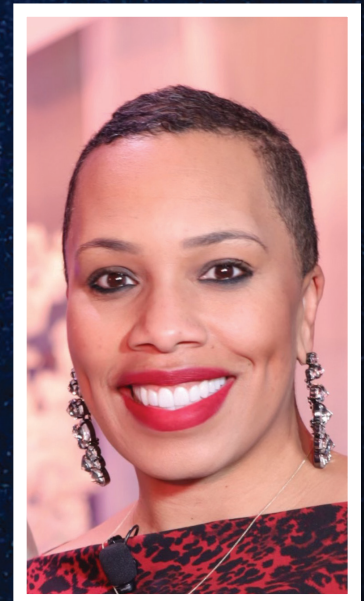

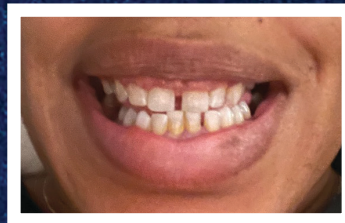

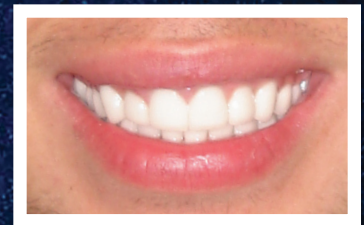

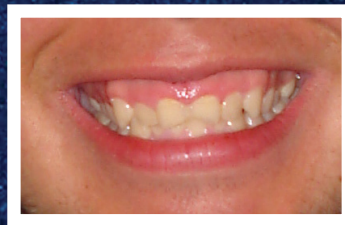

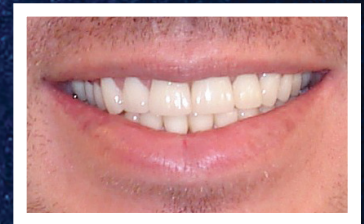

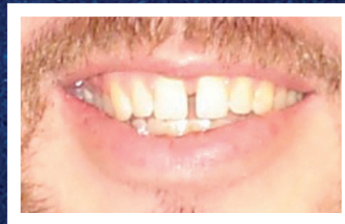

**Now providing implant "Conus" dentures which hold better when speaking or chewing, are much smaller and natural looking than conventional dentures, and easier to clean. Call now for a complimentary consultation and mention "Conus dentures."**

## TMJ-SLEEP APNEA? » WE HAVE A SOLUTION

The TMJ & Orofacial Pain Treatment Centers of Wisconsin and the Snoring & Sleep Apnea Treatment Centers were founded by Dr. Jay L. Mackman in 1982 and have been providing services to patients in southeastern Wisconsin for over 40 years. We are the only group practice in Wisconsin with dentists who are residency trained and/or board certified in orofacial pain and/or dental sleep medicine/oral medicine.

Temporomandibular joint disorder (TMD or TMJD) is only one part of orofacial pain, and successful management necessitates a dentist specially trained in the diagnosis and treatment of TMD to prescribe the appropriate type of individualized treatment for that particular patient. TMD symptoms can be so varied and mimic so many other conditions that the most important step in evaluating a possible TMD patient is to make a proper diagnosis. Once accurately diagnosed, treatment for TMD can be relatively straight forward and treatment options may include patient education, patient self-management, medications, an oral orthopedic appliance (splint) designed specifically for each patient's individually diagnosed symptoms and physical therapy (for the muscular component).

Our doctors are either board certified by the American Board of Orofacial Pain, the American Board of Dental Sleep Medicine, the American Academy of Oral Medicine and/or graduates of a two-year advanced residency program. Additionally, our doctors are diplomats, fellows and/or members of the American Academy of Orofacial Pain, the American Academy of Dental Sleep Medicine, and the American Academy of Oral Medicine.

**Choose the dentists with the most experience, advanced training and credentials in comprehensive TMD diagnostic and non-surgical treatment.**

For your convenience, our five offices are covered by most of the medical insurance companies in the state of Wisconsin and are exclusive providers for many of those in southeastern Wisconsin.

***Please call for a copy of our specially prepared booklet, "Understanding TMJ Disorder," and/or our brochure "A Guide to Understanding and Treating Snoring and Obstructive Sleep Apnea," containing information for both practitioners and patients***

People usually say, "I'd rather have a root canal!" when referring to doing something that they're dreading. That's because root canals have a reputation for being painful and scary, but at Premier Endodontics, we want you to know that's just not the case!

When a tooth needs a root canal, you may notice that the tooth has become painful to hot, cold, biting or chewing. You may notice that the tooth feels like it has a heartbeat or hurts all of the time. Sometimes, that pain can radiate out into your face or cause headaches. You may notice swelling in the gums around the tooth or in your face. All of these are signs and symptoms that you could have a tooth with an unhealthy nerve.

The root canal procedure treats the unhealthy nerve and allows you to save your tooth. An endodontist is a dental specialist that has received a minimum of two additional years in training in root

canal procedures. That additional training helps us ensure that your root canal procedure is completed quickly and that it is done right the first time. Many of our endodontists have gone the extra step of becoming board-certified in endodontics. Board certification is an optional program of several exams to recognize endodontists that have a high level of education and skill in the specialty of root canals.

At Premier Endodontics, we take pride not only providing excellence in root canals, but also in our patient communication skills. We explain what we're doing and why we're doing it. The only thing more important to us than communication is your comfort. We make sure you feel as little as possible during the procedure. Most patients tell us they didn't feel a thing. And while we hope you'll never need us, it's nice to know that if tooth pain happens to you, we're here to help save your teeth.

Technological dental advancements enhance patient care.

BY TERRY SCHUSTER

“Comfort” and “same-day restorations” are words not typically associated with dental care. But technological advancements in dentistry have revolutionized patient care, enhancing both precision and comfort levels.

Advanced software enables virtual treatment planning. Innovations such as CAD/CAM (computer aided design and manufacturing) facilitate same-day restorations, making dental care more efficient and convenient. And these advancements streamline processes and also improve the quality of patient care.

MKE Lifestyle checked with area professionals to explain some of the advancements.

## MKE LIFESTYLE: HOW HAS IMAGING IMPROVED OVER TIME? IS IT SAFER?

**Dr. James Michaels, Oconomowoc Dental Care:** Digital x-rays now allow us to more clearly and accurately see your teeth and to put them in a digital imaging program. We'll be able to get closer imaging than ever before. Our digital x-ray machine also exposes our patients to 80% less radiation than a standard x-ray.

## WHAT'S NEW WITH ROOT CANAL THERAPY?

**Dr. Michael Mendiola, DDS, Endodontic Specialists:** Many people wince at the thought of having root canal therapy. But a new option called GentleWave Ultracleaning procedure gives patients a quicker, more reliable and comfortable root canal than ever before.

With traditional root canal, a series of files are used to remove bacteria and diseased material. By contrast, the GentleWave procedure uses multisonic energy and specialized fluids to reach every corner and crevice of the tooth for a more complete cleaning and less change of reinfection. The process is so effective that it is usually done in one visit.

## TELL US ABOUT GETTING CROWNS IN ONE DAY.

**Dr. Laura Russell, DDS, Midtown Dental:** We've had this technology in place for several years; we call them CEREC (chairside economical restoration of esthetic ceramics) and refers to crowns that are constructed using computer design and manufacturing, also known as CAD/CAM technology. The bad-tasting impression materials are long gone and have been replaced by a convenient digital camera.

This advanced approach to making dental crowns allows us to create and deliver a crown in one appointment. When you come to the office for an appointment, we will prepare the tooth for the crown and take digital impressions. After the digital images are taken, we design the crown, mill it on a milling machine, and

sinter in an oven. Final step is to permanently cement the crown, and the patient goes home with the new crown! This entire process can be completed in under two hours.

**Dr. James Michaels:** In one visit, using our E4D Planscan CAD/CAM, we are able to scan, design, fit, and cement crowns and bridges, instead of waiting weeks for the lab to complete a design. This groundbreaking technology removes the need for impressions or powders, creating more accurate results.

## HOW CAN YOU PREVIEW THE RESULTS OF TOOTH REPAIR TREATMENT?

**Dr. Matt Smith, Stone Ridge Dental:** We offer the latest in treatment visualization technology. Using our Digital Smile Design software, we take extremely accurate measurements and photographs of your mouth and jaw. This imaging and measuring are combined with cutting-edge photo editing software to give our patients an accurate, easy visual “preview” of the results of their treatment before they even start. You can feel confident in the results throughout the treatment process.

## WHAT'S NEW IN GUM DISEASE TREATMENT?

**Dr. Laura Russell:** Laser treatment for periodontal disease represents a modern solution to a traditional problem. This method uses precise laser beams to target and remove the infected gum tissue without harming the surrounding healthy tissue. It's a less invasive alternative to conventional surgery and offers reduced discomfort and quicker patient recovery time.

The benefits of laser treatment for gum disease are numerous. Patients experience less swelling, bleeding, and discomfort than traditional surgery. The precision of the laser allows for targeted therapy, preserving more of the healthy tissue. The risk of infection is lower and the recovery period is significantly shorter, making it an attractive option for those suffering from periodontal disease.

**Dr. Matt Smith:** Periodontal laser treatment (called LANAP) is incredibly helpful in treating gum disease. This advanced laser therapy can target the source of the inflammation in the gums without hurting or removing any healthy tissue. In addition, the LANAP treatment can also slow or stop attachment loss and decrease pocket depth. **MKE**

## The Dentists On Bluemound

The second you step foot in this state-of-the-art office you become family. The Dentists on Bluemound continue to strike a perfect balance between modern dental office and the family dentist feeling one remembers from childhood.

Owner and Top Dentist, Dr. Tim Tikalsky says that the best part of the job is treating generations of family members. “Having a large family of my own, I truly love coming into the office and being welcomed into our patient’s lives.”

The Dentists on Bluemound offers a comprehensive range of dental services — preventative, restorative, and cosmetic — all under one roof. “Continuing education is vital,” states Dr. Tim. “This allows us to incorporate the newest technologies and techniques into practice and offer the latest procedures. There is a confidence that comes with having a great smile and sometimes that takes more than just routine care. We are pleased to also offer Invisalign® and teeth whitening.”

Dr. Tim shares that, “we are thrilled to have Dr. Elizabeth Schoenfeldt, Dr. Corbin Rusteberg and Dr. Jessica Melby who are not only top-of-their class, but are kind people who hold the same family office values that our patients expect.”

Dr. Elizabeth grew up in Bayside and graduated from UW-Madison and Marquette University Dental School. Dr. Corbin joins the practice from the Chicago area and received both his degrees from Marquette University. Dr. Jessie grew up in Cambridge, Wisconsin and completed her undergraduate studies at Wheaton College and received her dental degree from The University of Maryland Dental School. They join Dr. Tim who continues to be ranked among his patients and peers as a Top Dentist.

## A Dentist that Cares

About Your Family  
(almost) as Much as You Do

Czaplicki Family Dentistry is run by the husband and wife team of Drs. Don and Cathy Czaplicki who met at Creighton University Dental School, opened their practice in 1992.

Don and Cathy's comprehensive, collaborative approach has helped many patients with difficult dental restorative challenges and earned both Don and Cathy recognition by their peers who voted them among the area's top dentists.

"We often interact with other dental specialists and are very good at putting the various disciplines of dentistry together," Dr. Don Czaplicki said.

Czaplicki Family Dentistry offers a wide range of services from cleanings to implants, crowns and bridges, dentures, root canals, cosmetic dentistry and TMJ Treatment (treatment of the jaw joint).

The practice, located on Highway 100 a block south of Forest Home Ave., welcomes new patients and strives to provide the finest dentistry and care to all patients.

"To be able to complete treatment on a patient, relieve their pain and have them feel confident about their smile is the most satisfying part of the job. For some, it changes their life."

**6191 S. 108th St. | Hales Corners  
(414) 427-9090 | [drczaplicki.com](http://drczaplicki.com)**

At Czaplicki Dental we go above and beyond the recommended guidelines from the American Dental Association and CDC to ensure the safety for our patients and staff. Please go to our website at [drczaplicki.com](http://drczaplicki.com) to learn more.

## Major Dental Clinics

Major Dental Clinics has been synonymous with top-tier service provided by esteemed practitioners with an unparalleled dedication to delivering exceptional dental care with a personal touch.

Led by Drs. Daniel and Agnes Domagala, the clinic is renowned for its modern, tech-forward approach, particularly in dental implants, bone and gum regeneration and complete mouth restorations.

Dr. Daniel Domagala, a specialist in prosthodontics with over 20 years of experience, holds the title of associate professor in dentistry. His distinguished career includes receiving the Marquette Graduate Prosthodontics Scholarship, the American Prosthodontic Society Award and the Tylman First Prize for his research on dental implants.

“Most patients are referred to me when they are in dire situations,” he said. “Using advanced dental implants, we help them regain their ability to look great and function as they previously did.”

Dr. Agnes Domagala also brings over 20 years of experience to Major Dental Clinics. She serves as an Associate Professor at Marquette University School of Dentistry (MUSOD) and for 15 years directed MUSOD’s Dental Emergency and Special Care Clinic. “My expertise lies in managing complex dental cases, particularly those involving challenging medical histories, disabilities or anxiety,” she explained.

Her contributions have been recognized with honors such as induction into Omicron Kappa Upsilon, being named a Woman of Distinction while she also volunteers with Global Medical Relief and the Special Olympics.

**RESTORATION DENTAL**

Bridget Mackey, DDS

Restoration: the return of something to its original condition.

At Restoration Dental, health, function, and smiles are taken seriously. Our team provides all levels of care for all ages, and we are particularly passionate about ensuring that each patient has the ability to eat healthy foods, smile with pride, speak clearly, and live a pain-free life. All of these things can be compromised when one has the misfortune of experiencing tooth or gum disease, or when teeth are severely worn down.

We can help you achieve healthy teeth and gums for a lifetime of smiles!

Dr. Mackey is a proud graduate of the Marquette University School of Dentistry. She is a Fellow of the Academy of General Dentistry, and a member of the American Academy of Cosmetic Dentistry. She serves on the Board of Directors for the Greater Milwaukee Dental Association and as a Delegate for the Wisconsin Dental Association.

For patients without insurance, please inquire about our membership plan. We'd love to provide you with the smile and health you deserve.

**Dr. Scott Arbit**  
Board Certified Orthodontist

For over 30 years, Wisconsin has trusted Dr. Scott Arbit to provide quality and compassionate care for their orthodontic needs. He has successfully helped thousands of patients to achieve the healthy, long-lasting and attractive Smiles they have always wanted. Dr. Arbit is a board-certified orthodontist, an achievement obtained by a small percentage of orthodontists. He continues to train and study with top researchers and educators in the fields of TMJ, orthodontics, Invisalign and maxillofacial orthopedics. Dr. Arbit offers shorter treatment times, fewer office visits and improved comfort with rewarding results. Using a technology-driven 3D orthodontic process to produce a total experience which is easy, fast and accurate, Dr. Arbit makes his patients smile. As a leader, Dr. Arbit serves as President Elect for the Midwest Society of Orthodontists and has served as President of the Wisconsin Society of Orthodontists and the Wisconsin Society of Dentistry for Children.
