Thank you, Ranking Member Foxx, for protecting patients from surprise medical bills.

As of Jan. 1, 2022, millions of Americans are finally protected against the stress and financial harm of surprise medical bills. The Coalition Against Surprise Medical Billing commends Ranking Member Foxx for passing the **No Surprises Act** to put an end to costly surprise medical bills and lower patients’ health care costs.

As lawsuits threaten to weaken the consumer protections of the **No Surprises Act**, your continued support is more important than ever. Without the protections of the No Surprises Act, patients and families will pay higher premiums and higher out-of-pocket costs because of predatory price gouging.

Our coalition partners, representing employers, unions, patients, and health insurance providers, thank you for putting patients first.
