

If you are constantly on the lookout for the perfect cannabis strain that will meet your diverse physical and mental needs. Our easy to use Menu, along with our knowledgeable staff can assist you in choosing the best of our ongoing selections of strains.

We favor hand-trimmed, hang dried, quality flower. You can ask our helpful staff about the craft brands that we carry. Our products maintain the highest of standards for shelf stability, so you get the best buds. Craft growers work on a smaller scale, which sets them apart from standard producers. This allows them more time to dedicate per plant.

Blue Dream “Dudus Girl”

Blue Dream is a sativa-dominant hybrid marijuana strain made by crossing Blueberry with Haze. This strain produces a balanced high, along with effects such as cerebral stimulation and full-body relaxation. Blue dream is 18% THC but has a low CBD percentage, making this potent strain a fan favorite of both novice and veteran cannabis consumers. In terms of flavor, Blue Dream is reported to smell and taste like sweet berries. Medical marijuana patients often use Blue Dream to treat symptoms of depression, chronic pain, and nausea. Blue Dream originated in California and has since achieved legendary status among West Coast strains and has quickly become one of the most-searched-for strains in the Leafly database.

White Widow

“Chagi Norf”

Among the most famous strains worldwide is White Widow, a balanced hybrid first bred in the Netherlands by Green House Seeds. A cross between a Brazilian sativa landrace and a resin-heavy South Indian indica, White Widow has blessed every Dutch coffee shop menu since its birth in the 1990s. Its buds are white with crystal resin, warning you of the potent effects to come. A powerful burst of euphoria and energy breaks through immediately, stimulating both conversation and creativity. White Widow's genetics have given rise to many other legends like White Russian, White Rhino, and Blue Widow. Still, many growers prefer cultivation of the original White Widow.

Hybrid - THC 17% CBG 1%
Dominant Terpene: Myrcene

Effects:

- Pain - 26% of people say it helps with pain
- Depression - 24% of people say it helps with depression
- Insomnia - 13% of people say it helps with insomnia

OG Kush

“Marianas Trench”

OG Kush, also known as "Premium OG Kush," was first cultivated in Florida in the early '90s when a strain from Northern California was supposedly crossed with Chemdawg, Lemon Thai and a Hindu Kush plant from Amsterdam. The result was a hybrid with a unique terpene profile that boasts a complex aroma with notes of fuel, skunk, and spice. OG Kush should smell like lemon-pine-fuel with a high-THC, mixed head and body effect. It's often enjoyed in the back half of the day to ease stress. The genetic backbone of West Coast cannabis varieties, OG Kush arrived in Los Angeles in 1996 when Matt "Bubba" Berger brought it (along with "The Bubba," which was later used to create the famed Bubba Kush) from Florida to legendary cultivator Josh D. Since then, OG Kush has become a worldwide staple used to create numerous famous strains like GSC and Headband. There are many different phenotypes of OG Kush, including Tahoe OG, SFV OG, and Ghost OG.

Hybrid - THC 18% CBG 1%
Dominant Terpene: Myrcene

Lemon Sour Diesel

“Fotte”

Lemon Diesel is a hybrid marijuana strain made by crossing California Sour with Lost Coast OG. This strain produces effects that are relaxing but still allow you to be focused and coherent. Some say Lemon Diesel is a creeper strain, meaning that the high comes on slower than you might expect. This strain offers a delicious flavor that is fruity and sweet with hints of citrus and pepper. This strain placed in the top 10 at the Emerald Cannabis Cup in 2010.

Anxiety - 29% of people say it helps with anxiety
Depression - 27% of people say it helps with depression
Pain - 19% of people report feeling pain
Fatigue - 12% of people report feeling fatigue

Bruce Banner

“Taima’nao”

Bruce Banner might be best known as the alter-ego of comic book hero The Incredible Hulk, but maybe he wouldn't be such a stressed out ball of anger if he just had some of his namesake strain. This green monster also has hidden strength and features dense nugs that pack the power of very high THC content. It's a powerful hybrid strain whose effects come on quickly and strong and then tend to settle into a euphoric and creative buzz. The effects of this strain are most evident and linger mostly in the head, but it may also provide body relaxation that make it an appropriate daytime bud for some. Dark Horse Genetics bred this strain from OG Kush and Strawberry Diesel, and its heritage can be found in its diesel aroma with sweet undertones.

Hybrid - THC 21% CBG 1%
Dominant Terpene: Myrcene

Effects:

- Happy - 54% of people report feeling happy
- Euphoric - 53% of people report feeling euphoric

- Pain - 20% of people say it helps with pain
- Anxiety - 19% of people say it helps with anxiety
- Fatigue - 10% of people say it helps with fatigue

Purple Punch

“Taga Stoned”

Purple Punch is the sweet and sedating union of two indica-dominant classics. By breeding Larry OG with Granddaddy Purple, the astonishing Trichome laden Purple Punch was born, smelling of grape candy, blueberry muffins, and tart Kool-Aid. The potency of this strain gives the consumer a one-two punch to the head and body, initially landing between the eyes and settling down into the limbs. Purple Punch is a delicious dessert strain that is best suited for after dinner. Its effects may help with managing nausea, stress, minor body aches, and sleeplessness.

Indica - THC 19% CBD 1%

- Insomnia - 17% of people say it helps with insomnia
- Depression - 17% of people say it helps with depression

Girl Scout Cookies

“Rota Buds”

GSC, also known as "Girl Scout Cookies," is an indica-dominant hybrid marijuana strain made by crossing OG Kush with Durban Poison. This popular strain is known for producing euphoric effects, followed up by waves of full-body relaxation. One hit of GSC will leave you feeling happy, hungry, and stress-free. Those with a low THC tolerance should take it slow with GSC as the effects of the strain may be overwhelming. The high THC content in GSC is beloved by medical marijuana patients looking for quick relief from symptoms associated with chronic pain, nausea, and appetite loss. GSC is famous for its pungent, dessert-like aroma & flavor profile featuring bold notes of mint, sweet cherry, and lemon. According to growers, this strain flowers into green and purple buds with fiery orange hairs. This strain has won numerous accolades and awards over the years, including a few Cannabis Cups.

Hybrid - Indica - THC 19% CBG 1%
Dominant Terpene: Caryophyllene

Effects:

- Anxiety - 25% of people say it helps with anxiety
- Insomnia - 13% of people say it helps with insomnia

Wedding Cake

“Fina’ mames”

Wedding Cake, also known as "Triangle Mints #23," is a potent indica-hybrid marijuana strain made by crossing Triangle Kush with Animal Mints. Wedding Cake provides relaxing and euphoric effects that calm the body and mind. This strain features a rich and tangy flavor profile with undertones of earthy pepper. Medical marijuana patients choose Wedding Cake to help relieve symptoms associated with Pain, insomnia and appetite loss. Consumers with a low THC tolerance should enjoy this strain with an extra slice of care due to its high THC content. Wedding Cake has soared in popularity over the years and was named *Leafly Strain of the Year* in 2019. Fun fact: In Canada, this strain is known as Pink Cookies.
