The presently slated improvements are as follows:

Jefferson County, Missouri, is proposing a bridge replacement on Hillsboro House Springs Road Bridge over Bourne Creek. The existing structure is considered structurally deficient. The proposed structure is a pre-cast concrete arch structure that will be 36' wide x 110' long. New revetment rock is planned to line the creek banks to prevent erosion. A concrete bridge barrier will be installed on the structure with guardrail installed along the approaching roadway. Roadway work will be necessary to tie-in grades and the existing roadway. The total length of the project is 600 feet.

Tentative schedules for right of way acquisition and construction can be discussed at the hearing.
