Rose Street and 2nd Avenue Intersection Traffic Signal Modification Work

WALLA WALLA, Wash. — Beginning Monday, January 6, 2025, the contractor for the Rose Street Preservation Project will be upgrading the traffic signal at the intersection of 2nd Avenue and Rose Street. This work is expected to last approximately one week and includes replacing signal heads, signage, vehicle detection cameras, video processors, and emergency response preemption systems.

Although the intersection will remain open, there will be lane shifts and closures to allow necessary equipment access for reaching the mast arm to install the traffic signal upgrades. Motorists should anticipate significant traffic disruptions and are encouraged to consider alternative routes. Please be cautious in the work zone by following flaggers' directions, and pay special attention to personnel, equipment, and pedestrians.
