Governor Walker signed five-party joint development agreement to reassess undiscovered oil and gas resources in NPRA.

Assessment will focus primarily on resource potential of Nanushuk and Torok Formations. Reassessing undiscovered oil and gas resources in Beaufort Sea OCS. Assessment will focus primarily on resource potential of Nanushuk and Torok Formations.

Estimates of undeveloped resources in most of the Alaska North Slope interior oil and gas areas have been updated since the 2014 National Resources Assessment (NRA).

Despite the relative ease and low cost of estimating resource potential in the Beaufort Sea, reassessment of the producing portion of these areas will begin soon.

Three wells will evaluate the Willow prospect in NPRA. Plan to drill five exploratory wells this coming winter. Three wells will evaluate the Willow prospect in NPRA. Plan to drill five exploratory wells this coming winter.

First oil expected in 2018. Project to consist of five to eight production wells, four to six injection wells, and up to two disposal wells.
