501 Manhattan Blvd  
Harvey LA 70058

Dear Ms. Doucet:

I am writing this letter on behalf of the African American Community. We will be filing a complaint with the ethics board and the Department of Justice on your treatment of black children, teachers, support persons and administrators. You have made several documented openly despairing remarks against black children and employees. You have attempted to destroy everything that you perceived would be a benefit to black children. You are on a mission to turn back the clock to the Jim Crow Era of educating black children in a system of separate but UNEQUAL. We got the message that you only care about white students and white employees. The coalition is prepared to present evidence as well as testimony to the gross unfair treatment of the African American community as a whole.

How dare you as someone who is NOT a college educated individual give opinions without the knowledge to legitimately pass those opinions. School system employees at every level are prepared to present evidence on your conspiracy to denigrate schools which are heavily populated by African American students. We have evidence that you conspired with an outside source to make false allegations against the system and its employees. We will not allow this RACIST behavior to continue to make decisions over students and people that you have a vendetta against because their skin color happens to be black. We will revisit you for the next election. We will be taking legal action you for slander.

Sincerely,

A Coalition of Concerned African  
American Citizens demanding Justice for  
African American Children & Employees
