## Fighting Germs

UNMC students came to Lincoln Montessori on Tuesday, February 24th to talk to our first and second graders about the importance of thorough hand washing. They talked about all the ways students can get germs, how to cover your cough and sneeze into your elbow, and then how to thoroughly clean their hands.

To demonstrate, they put gel on their hands to represent the germs. The kids then washed their hands and then they used a flashlight to see if they got all the "germs" washed off.

It was interesting to see all the germs left behind after thinking they washed them real good. This was the perfect season to talk about germs and handwashing with all the sickness going around. Thank you to UNMC for their presentation!

The mission of Norfolk Public Schools is to prepare all students to pursue their goals for the future.
