

Panther Project

"United We Learn"

The fourth graders are off to a wonderful start as they begin a year of learning and teamwork. With this year's theme, "United We Learn," students are discovering that learning is even more meaningful when we work together.

One of their first big projects has been exploring the 50 states of the United States. Each student has been learning about the unique geography, history, culture, and interesting facts that make each state special.

Students are practicing teamwork, communication, cooperation, and listening to others. They are learning how to share ideas, encourage their classmates, and work together toward a common goal.

As the school year gets underway, our fourth graders are showing that when we learn together, support one another, and celebrate what makes each of us unique, we can accomplish great things.

The mission of Norfolk Public Schools is to prepare all students to pursue their goals for the future.
