State Rate Of Jobless Takes Dip

Figure in Omaha Is 6.5 Per Cent

By Roger Lewis

Nebraska's unemployment rate dropped to 4.7 per cent in May, the lowest level since last November, State Labor Commissioner Gerald Chizek said Monday.

Omaha and Lincoln unemployment also declined to the lowest rates since late last year. There were increases in employment in all job categories except manufacturing, which continued to decline, Chizek said.

The May statewide figure compared to 5.7 per cent in April. The Omaha area rate, which includes Douglas, Sarpy and Pottawattamie Counties, dropped from 7.6 per cent in April to 6.5 per cent in May. Lincoln's May rate was 4.9 per cent, down from 6 per cent in April.

Up From Year Ago

The rates still were up from May 1974, when the statewide figure was 3 per cent. Omaha, 4.2 per cent, and Lincoln, 2.7 per cent. But they were the lowest statewide since November 1974, and lowest in Omaha and Lincoln since December.

The statewide unemployment rate last November was 3.9 per cent. In Omaha last December it was 6.1 per cent; in Lincoln it was 4.7 per cent.

Chizek said there were major seasonal increases in the number of persons employed in agriculture-related work and construction in May. The number employed statewide in agriculture rose from 98,700 in April to 105,700 in May; in construction from 29,300 in April to 33,400.

The number employed in manufacturing statewide declined from 85,600 in April to 85,000 in May.

$3.9 Million Benefits

The total number of persons unemployed statewide in May was 34,870, down from 41,358 in April. In Omaha, the number dropped from 19,709 in April to 17,139 in May, and in Lincoln, from 5,959 to 4,913.

Unemployment benefits totaling $3.9 million were paid out in Nebraska during May, down from $5.4 million in April.

Tennis Tough As Cosby Lobs Quips

By Michael Holmes

It started as a whim. But Bill Cosby liked the idea and a 14-year-old found that Cosby is not only funny but "plays really good tennis."

When they learned that Cosby was coming to Omaha to do a benefit for the Mary and Rob

Review on Page 29.

Preschool, John Staenberg's stepfather, Elliot Hechtman, suggested that he phone Cosby and invite him to a tennis match at the Omaha Racquet Club.

"The thing is, though, you can never tell if my dad's serious or not," John said Monday.

"I said it would be a great idea. He said: 'Do it.'"

So, John did.

It took seven phone calls from 525 North Seventy-fourth Street to the Las Vegas, Nev., Hilton before John got through to Cosby about 11 p.m. two weeks ago.

"The only way I could talk to him was because I'm a friend of Charlene Gibson (daughter of St. Louis Cardinals pitcher Bob). I told him I understood he was coming to Omaha and wondered if he'd like to play tennis."

Cosby yawned "and said okay," John reported.

A call to the comedian's secretary completed the arrangements. At 5 p.m. Sunday, Cosby's limousine pulled into the club.

John, who ranked second last season among Nebraska's 14-year-old tennis players, sized up his opponent. "I didn't think he'd be very good."

But, after Cosby won the first two games of their singles match, "I though I'd better start doing something."

Trouble was, you can't play against the creator of Fat Albert and keep a straight face. "It was hard to concentrate,"

He told jokes, wisecracked and "laughed when I'd miss a shot," John said. "He's really funny. But if it had been anybody but Bill Cosby, I'd have killed 'em."

When their set ended, Cosby earned a narrow, 7-6, victory.

Of course, his presence on the court drew a gallery of spectators and "that made it harder to concentrate." But John joined Cosby for a doubles match against his father and Joe Blu, club owner.

Cosby and John lost that one, 7-6.

John said he has invited Cosby to a rematch the next time he's in town. "He said he'll play."

And John will be prepared for tennis and jokes. "I'll just put on a set of earmuffs and play him."

John and Cosby on court . . . "He's really funny and good."

Inside Today

Post Office Open On West Center

West Omaha Post Office on South Seventy-second Street, destroyed by a tornado May 6, has skipped to a new location on West Center Road. Picture and details **Page 4.**

Computer 'Outsmarted'

Paper: Cheating at U of I

Iowa City, Ia. (AP) — One Univeristy of Iowa medical student reportedly is under a one-year suspension and six others are on one year's disciplinary probation after a cheating incident at the College of Medicine.

The report was in a copyrighted story in the Des Moines Register.

The paper said the cheating involved outsmarting a computer that administers tests, so an advance copy of the test was obtained from the computer and circulated among some students scheduled to take the tests.

Names of the students involved — all members of last year's freshman class — cannot be released because of U of I rules protecting students' privacy.

The paper said the matter came to light when several medical students complained to officials that copies of a pathology test were available in advance to some students.

Corrections Aide Fired by Terry; 'Let Report Lag'

Tim Kielty has been dismissed as Douglas County corrections coordinator by his new boss, Corrections Director Charles Terry.

Kielty's dismissal is effective June 26, Terry said. Kielty, 28, has been corrections coordinator since February 1972.

Terry, named corrections director two weeks ago, said he fired Kielty because of lack of progress on a corrections plan, which the county has been told it must have by Sept. 1 to qualify for federal aid.

Work should have been done on the plan during the last year, before an acting director or director was named for the department, Terry said. The coordinator should have done that work, he said.

— World-Herald Photo.

Kielty

The director said he was told that Kielty did not have the authority to undertake "preliminary coordination and program planning." However, Terry said, he found that claim "did not ring true."

Terry also said there was a lack of communication with the Citizens' Advisory Board on Corrections while Kielty has been coordinator, and that has made it difficult for Terry to obtain assistance from that group.

Kielty declined to comment Monday and said he would make a statement later. Prior to being selected coordinator by the Douglas County Board, Kielty was on the staff of Sen. Roman Hruska.

New Cruise Missile: Arms Debate 'Bomb'

'New York Times Service.

Washington — The Defense Department is developing a new strategic weapon that could add to the nuclear striking power of the United States as well as complicate attempts to curb the atomic arms race.

The weapon, a missile called the Cruise, is in advanced development. It could be launched by submarine or bomber.

Powered by a small jet engine and directed by a miniature computer, it would fly at low altitudes for up to 1,500 miles and deliver a nuclear warhead with high precision.

The Cruise is a descendant of the German "buzz bomb" of World War II and the winged, jet-powered missiles developed by the United States and the Soviet Union in the 1950s. With its greater accuracy and range, however, the Cruise introduces a new dimension to strategic warfare.

When deployed on submarines, it would, in effect, add a fourth leg to the United States, strategic "triad," consisting of manned bombers, land-based intercontinental ballistic missiles and submarine-launched ballistic missiles. With the relatively low-cost Cruise, the United States could add thousands of weapons to its arsenal.

The Cruise is emerging as a major issue within the arms-control community as well as in the talks with the Soviet Union on arms limitations.

Arms control specialists say the Cruise is militarily unnecessary and a potentially destabilizing development in the arms race.

In the "Yearbook on World Armaments and Disarmament," published by the International Peace Research Institute in Stockholm, Dr. Kosta Tsipis, a nuclear physicist at the Center for International Studies at the Massachusetts Institute of Technology, says the Cruise's technological advances "could drastically alter the conduct of both tactical and strategic warfare."

The Cruise also is emerging as a potential obstacle to a treaty based on the Vladivostok agreement on strategic arms reached last November by President Ford and Soviet leaders Leonid Brezhnev.

The unresolved dispute is whether the Cruise should be included within the limit of 2,400 "strategic delivery vehicles" that the Vladivostok agreement would impose on both nations.

The United States has taken the position at the talks on strategic arms that the limitation should not apply to the Cruise, particularly those missiles launched by submarines, but only to intercontinental ballistic missiles, submarine-launched ballistic missiles and heavy bombers.

The Soviet Union, which Pentagon officials say is far behind the United States in Cruise technology, insists that long-range Cruise missiles be included in the limitation.

Energy Call: Get Together

Washington (UPI) — Senate Democratic Leader Mike Mansfield says American motorists soon will be paying about $1 a gallon for gasoline if Congress and President Ford cannot get together on an energy program.

Mansfield said Ford's $3-a-barrel tariff would raise gasoline prices to about 70 cents a gallon. "On top of that, you have the recent decision by the OPEC (oil-producing) countries to praise prices by 30 per cent in September," he said.

Mansfield said gasoline prices will rise in any event, but Congress and the White House must agree on a program to cut large-scale waste — "around 40 per cent" of the supply.

"We have so much gasoline now that it's running out of our ears," Mansfield said.

The House is to resume work Tuesday on the energy tax bill.

Turkey to Revise U.S. Commitment

Ankara (UPI) — Turkey's National Security Council said Monday the U.S. arms embargo violated American agreements with Turkey and that Turkey must revise her military commitments to the United States.

Government sources said this may mean an early closing of the 25 U.S. military bases in Turkey. They said the government may soon announce a timetable.

The security council met for seven hours under President Fahri Koruturk to discuss the embargo imposed by the U.S. Congress because of the Turkish landing on Cyprus last year.

Court Refuses To Free Rice

Washington (AP) — The Supreme Court Monday refused to order David L. Rice released on bail pending appeal of a federal court order overturning his conviction in the death of an Omaha, Neb., policeman.

U.S. District Court Judge Warren Urbom of Lincoln, later upheld by the U.S. Circuit Court in St. Louis, ruled last July that evidence used in Rice's trial was obtained illegally. Rice has remained in custody as a result of stay orders obtained by the state while it appealed the lower-court decisions.

The state's petition for Supreme Court review is now pending.

Rice and Edward Poindexter were convicted of first-degree murder in connection with an explosion Aug. 17, 1970, which killed Patrolman Larry D. Minard.

Tornado Repair Loans

Stillwater, Okla. (AP) — Gov. David Boren Sunday ruled out the use of a contingency fund to repair tornado-damaged Oklahoma State University buildings.

Legal Fee Schedule Loses in High Court

Washington (AP) — The Supreme Court Monday struck down minimum legal-fee schedules for real estate transactions in an 8 to 0 decision which probably also spells the end of fixed fees for other legal services.

The court ruled that minimum fee schedules established by state or local bar associations violate federal antitrust law whenever the fees affect interstate commerce.

Abortion advertising bans struck down, Page 2.

The decision was a victory for a Virginia couple, Lewis H. and Ruth Goldfarb, who challenged the Fairfax County Bar Association's fixed minimum fee for legal work required when they bought a home.

Justice Department

It also was a victory for the Justice Department, which has waged a battle against fee schedules established by professional associations. The department supported the Goldfarbs.

Writing for the court, Chief Justice Warren Burger said, "In terms of restraining competition and harming consumers . . . the price-fixing activities found here are unusually damaging."

He said the Goldfarbs could not buy a home without a title examination and that only a lawyer licensed in Virginia could perform the work, so the Goldfarbs "could not turn to alternative sources for the necessary service."

'Rigid Floor'

The fee schedule issued by the county bar association established "a fixed, rigid price floor" and the schedule "was enforced through the prospect of professional discipline from the state bar and the desire of attorneys to comply with announced professional norms," Burger said.

"These factors coalesced to create a pricing system that consumers could not realistically escape," Burger wrote. "On this record (the bar association's) activities constitute a classic illustration of price-fixing."

Omaha Bar Chief: No Effect in State

Clayton Byam, Omaha Bar Association president, said the Supreme Court action regarding legal fee schedules will not have any effect in Nebraska.

Byam said both the Omaha Bar Association and the Nebraska Bar Association discontinued advisory fee schedules "at least two years ago."

He said that the fee schedules were abandoned because of several cases in the court regarding legal fees, including the Goldfarb case.

Rain, Perhaps Downpour, A Possibility in Evening

Showers and thunderstorms reign over the Omaha forecast.

Forecasters add that there's a chance of a few heavy thunderstorms this evening.

Measurable precipitation chances are 60 per cent tonight, 50 per cent Tuesday.

Temperatures aren't expected to change much: A low tonight in the low to mid 60s and a high Tuesday in the low to mid 80s are forecast.

Some brisk showers in eastern Nebraska late Sunday and early Monday produced three-quarters of an inch or more of rain in spots. Emerson reported the most officially Monday morning — .82 of an inch.

While heaviest rainfall was confined to the northeastern part of the state, southeast sections also got some precipitation. Hickman, .60 of an inch, had the most, unofficially.

Much lighter amounts were recorded in the Omaha area. Eppley Airfield had .15 of an inch; North Omaha .19; Prairie Lane, .24.

The State Patrol reported that stiff winds accompanying a thunderstorm in southeast Nebraska early Monday downed some trees and power lines near Milford. No one was injured.

Culvert Work Closes W. Dodge Near 275

West Dodge Road between County Road 92 (262nd Street) and Highway 275 was closed Monday for replacement of a narrow bridge with a culvert, Douglas County Surveyor Louis Lamberty said.

The work, a State Roads Department project, will keep the road closed about two weeks, Lamberty said he was told by state officials. Only local traffic will be permitted, he said.

Blast Rocks Bank in N.Y.

By the Associated Press.

An explosion broke windows in the Puerto Rican-based Banco de Ponce Monday in Rockefeller Center. A short time later, a person claiming to represent the Weather Underground said the group had touched off the blast in support of "the Puerto Rican cement workers."

The only injury reported was suffered by an unidentified driver of a bakery truck passing through the area. Flying glass cut him on an arm.

The explosive device, which police said apparently was a medium-sized bomb, went off at 3:43 a.m. CDT in the bank's revolving door.

Windows as high as the sixth floor of the RCA building across from the bank were broken.

About 450 cement workers are on strike in the city of Ponce on Puerto Rico's southern coast. There have been six incidents of violence, including three bombings, since the strike began Jan. 31 against Ponce Cement, the largest cement producer on the Caribbean island.

Bombs Explode In San Juan

San Juan, P.R. (AP) — Four bomb blasts shook a San Juan suburb Monday in a terrorist attack against a telephone lines installation company, police said.

The explosions partially destroyed four panel trucks of the Church and Tower Corp., a firm subcontracted by the struck Puerto Rico telephone authority.

Moderator Elected

Charlotte, N.C. (UPI) — The Rev. Dr. Paul M. Ebris of Daytona Beach, Fla., was elected moderator of the Presbyterian Church in the United States, outpolling the Rev. Dr. Robert S. Jones of Fort Worth, Tex., 260-108.

Thinking American Tires Viet Family

The following was written by a long-time UPI correspondent in Saigon who left before the Communist victory and spent time in two refugee camps.

By Nguyen Anh Tuyet

Los Angeles (UPI) — The first time I walked the streets of the city, I felt uneasy. When I realized that nobody paid any attention to me — a Vietnamese refugee — I regained my composure.

But I felt lost.

That feeling soon faded. I tried to be casual and, difficult as it was, act like an American in an American city, and at the same time take delight in all the marvels of daily life.

My wife, our two sons and I found with much relief the warmth of an American family, the good food, the captivating color television.

Freeway Fright

We also faced with fright the California freeways. When we came to the United States at night we, like thousands of others Vietnamese refugees, saw only lights, dark silhouettes of houses and more houses and the unending and continuously vibrant freeways.

It was when we got out of Camp Pendleton more than a month ago that our real American life first began. Since then, we have not ceased to learn, to be surprised and sometimes to be frustrated.

The hasty evacuation, the long flights from camp to camp across the Pacific Ocean ended on the California coast where the sprint cold hit us like a cold shower. The American soil was a destination many of us never had thought of. We only hoped we could be settled in some country in Asia.

No Time

We never had time to think of what was happening, nor did we have time to rest. We all had upset stomachs because of the different food and beverages given to us and because each time we had to eat fast after standing in line for an hour or so.

At Wake Island, it was waxed beans, scrambled eggs, bacon and rice at breakfast, lunch and dinner. At Camp Pendleton, it was strict GI rations.

In one day we moved from the Camp's Quonset huts to a luxurious hotel with swimming pool, air conditioning and standard food. The change was staggering.

We rented an apartment in suburban Monteblo. By that time our two sons already had toured Disneyland, driven by homes of Hollywood stars and down Sunset Strip, and saw the Pacific Ocean and the Los Angeles Zoo.

"I am so tired, trying to rot-
