**NARRATIVE REPORT
SPARTANBURG COUNTY DETENTION CENTER
ANNEX II**

July 19, 2022

On July 19, 2022, an inspection of this facility was conducted by Mr. Robert E. Ellison, Jr., Detention and Correctional Inspector, with the following violations noted:

1031 - Number of Personnel:

- (b) Each facility shall have sufficient personnel to provide twenty-four (24) hour supervision and processing of inmates, to arrange full coverage of all identified security posts, and to accomplish essential support functions.

The staffing shortage explained within the Main Jail inspection report reflects violations at this facility location also.

2014-16 - Toilets:

Inmates have access to toilets and hand-washing facilities twenty-four (24) hours per day and are able to use toilet facilities without staff assistance when they are confined in their cells/sleeping areas. Toilets are provided at a minimum ratio of one (1) for every twelve (12) inmates in male facilities and one (1) for every eight (8) inmates in female facilities. Urinals may be substituted for up to one-half of the toilets in male facilities. All housing units with three (3) or more inmates have a minimum of two (2) toilets.

During the times of overcrowding, this facility is in violation of the Standard.

2014-18 - Showers:

Inmates have access to operable showers with temperature controlled hot and cold running water at a minimum ratio of one (1) shower for every eight (8) inmates. Water for showers is thermostatically controlled to temperatures ranging from one hundred (100) degrees to one hundred twenty (120) degrees Fahrenheit in order to ensure the safety of inmates and to promote hygienic practice.

During the times of overcrowding, this facility is in violation of the Standard. Also, numerous complaints were received during the inspection regarding the lack of warm water in the showers.

2014-40 - Maintenance:

All portions of existing buildings, both interior and exterior, are maintained in such manner that structural strength, stability, sanitation, indoor air quality, and safety of life and property are free from fire and other hazards. Repairs and upkeep are provided to ensure public safety, health, and general welfare.

Due to heavy usage, the residential style showers are in a deteriorated condition and are in need of repair or of replacement. Furthermore, general repairs are required throughout the facility.

2015 - Living Units - Non-Direct Supervision Facilities Since 1980:

Unless otherwise noted, this Standard applies to all facilities which became operational or for which plans were submitted and approved after July 1980.

- (b) All cells, rooms, or dormitories shall have, at a minimum, seventy (70) square feet of floor space per inmate if single occupancy, and forty (40) square feet of floor space per inmate if multiple occupancy, with no less than seven (7) feet between walls and eight (8) feet between floor and ceiling.

Based on average daily population figures, the facility routinely exceeds its rated capacity, constituting a violation of this Standard. The living space known as Area 2 was totally empty at the time of this inspection, which caused the overcrowding to be even greater in other housing units.

2035 - Exercise:

Each facility shall develop and implement an exercise program which includes the following provisions:

- (a) For those inmates held more than seventy-two (72) hours, each inmate in the general population shall be given the opportunity to participate in at least one (1) hour of physical exercise each day outside the cell. When weather allows, a minimum of three (3) hours per week of such exercise should take place outdoors.
- (b) Whenever possible, three (3) hours per week of physical exercise away from the cell or room should be provided for any inmate confined to segregation. When weather allows, such exercise should take place outdoors.

Outdoor exercise is not being provided. The recreation yard previously used was across the street next to the Annex I building. That structure has been razed, and outdoor exercise space for Annex II no longer exists.

2082 - Laundering of Bedding and Linens:

An adequate supply of bedding and linens shall be maintained so that the following laundry or cleaning frequencies may be adhered to:

- (a) Issued linens shall be changed and washed at least once a week.
- (b) Mattresses shall be disinfected or sanitized monthly and before re-issue.
- (c) Blankets shall be laundered, or otherwise sterilized, monthly and before re-issue.
- (d) A clean towel shall be issued at least twice weekly.

Covers on many of the mattresses are cracked or are otherwise deteriorated, making proper sanitation as required by this Standard difficult to accomplish.
