Let us straighten out your kids.

Getting braces is much more common for kids today than it used to be. Many kids and teens use their braces as an opportunity to show off their creative side.

Products like colored braces, clear braces, WildSmiles® braces, and Clemson Tiger or USC Gamecock mascot braces allow kids to be creative with their treatments.

Get a check up no later than age 7 to determine if treatment is needed to:

- Guide proper jaw growth
- Correct protruding teeth to reduce risk of trauma
- Direct permanent teeth into proper position
- Hinder harmful oral habits
- Improve appearance and build self-confidence

Dr. Nick Savastano DMD, MS has over 15 years of clinical orthodontic experience
