SDS Blocker CL-40

SDS Blocker CL-40 is a personal space sanitizer, deodorizer and shield of protection from viruses, bacteria, germs, and pollen.

SDS Blocker CL-40 safely utilizes the sanitizing power of ClO₂ to offer an atmospheric shield for protection against germs, viruses, bacteria, pollen and odors. This patented new granulated oxidizer allows ClO₂ to be released slowly creating a shield of protection around the person wearing the SDS Blocker CL-40.

- Safe and easy to use
- Creates a 1 meter protective shield of ClO₂
- Lasts 30 days after opening
- Worn on a lanyard or put in shirt pocket
- Can be used as a name tag
- ClO₂ kills or deactivates many pathogens in seconds
- ClO₂ neutralizes pollen in the air
- ClO₂ neutralizes odors and sanitizes
- Wear SDS Blocker CL-40 anywhere you go; Work, traveling, day care, hospital, shopping, everywhere you need protection.

SDS Blocker CL-40 Personal Shield of Protection

Traditional Disinfectant

Kills from the inside
in as little as
7-10 minutes

ClO₂

Kills from the outside
in as little as
30 - 90 seconds

ClO₂ is a well-known sanitizer and disinfectant approved by FDA for many applications. It is used all over the world to sanitize or disinfect water, surfaces and other breeding grounds for pathogens.

Influenza A and B and norovirus (Norwalk virus) are examples of enveloped viruses that are hard to kill. ClO₂ is uniquely able to penetrate this protein envelope and disable these pathogens. ClO₂ is also effective for penetrating the proteins surrounding certain pollens to render them harmless.
