

Blackwell Road 230 kV Transmission Line and Substation Project Update

**Fauquier County Board of Supervisors Working
Session
November 10, 2022**

Since we last met...

New Proposed Electrical Solution

- Previously proposed routes no longer under consideration to serve Blackwell customer
- Substation “Off-site”
 - Located closer to the existing transmission line for tap-in point
 - Would require a much shorter or even no transmission line span, depending upon parcel location
 - Longer distribution line up to Blackwell site (underground line)
- Evaluating Two Parcels
 - One privately owned; one County-owned
 - First preference is privately-owned parcel due to space and anticipated access needs
 - County parcel is directly under existing transmission line; however, access may be a concern

New Proposed Routes

Next Steps

Incorporate Feedback Into Routing

Need to meet with County, Town, community to refine and continue to evaluate based on feedback

Public Engagement

Plan next community meeting

SCC Application

If needed, still looking toward early spring 2023
