HOMES FOR

Directions for Attracting Singing Feathered Friends.

DESTROY THE SPARROWS

They Should Be Killed Remorseleszly. Houses for Martins, Wrens, Bluebirds-The Value of Shrubbery

By EDWARD B. CLARK. Associate Member American Ornitholo-glsts' Union.

It would be grateful to the writer of these few summer articles upon birds to know that his words had stimulated interest enough to induce some of his readers to welcome the birds to their homes when the spring comes once again and the feathered army is marching, with the north star as a guidon

Whether you live in city or country you may have the birds as companions if you will but prepare for them the houses in which they like to dwell, or see to it that conditions of surroundings of yard, garden or orchard are made congenial. Something of this has been said in a previous article, but the attempt will be here to give specific directions for the attracting and holding of our tuneful friends. GET RID OF SPARROWS.

It may be a shock to some of our humanitarians when it is said that the first manitarians when it is said that the first necessary step of preparation for securing robin, wren, bluebird, ortole, martin and other feathered neighbors is the getting rid of the companionship of the pestiferous English sparrow, the unspeakable feathered pirate, the "avian rat" of our domestic life. Call him what you will, there is no term too harsh and no name which in the description of his utter worthlessness and savagery can go utter worthlessness and savagery can go beyond the bounds of truth

I have seen the English sparrow kill our native birds; I have seen him rob the young of the food which their patient and too timid parents had brought them: I have seen him tear to pleces the laboriously built nests of the robin and the wren. He deserves no mercy, and he should be shown none. If you wish song birds about your doorstep, kill this murderous little thief with the rusty hings creak in his throat, and in the killing make the world better by the loss of a pest and add to your lives the music of the birds whose ways are loving and whose companionship is sweet.

This coming winter arm yourself with a small rifle, and use cartridges filled with a few bird shot. You won't harm your neighbors with this kind of a charge, neither will you make nelse enough to bring you into discredit. If you simply wish to keep your own premises free from parrow kill four or they of them. I have seen the English sparrow kill

wish to keep your own premises free from sparrows kill four or five of them a day for a week and after that for some time you can't get one of the cuming rascals to come within sighting distance of your yard. If after a month, they show a disposition to become bolder kill a few more, and keep at it at odd intervals well into the spring.

THE POISON PLAN. If you wish to do all your neighbors

If you wish to do all your neighbors a service go to work systematically to fell the sparows. Frank Bond, now connected with the government biological survey and formerly a resident of Wyoming rid Cheyenne of English sparrows in a single season, and when he started out there were thousands upon thousands of the savage little aliens in the city streets. Mr. Bond used poison. In fall and winter the sparows feed in great flocks. Find out one of their favorite feeding grounds, choose a bare spot near by and strew it with poisoned wheat. You will soon reap a harvest of the only-good sparrows read ones. Watch the place where the wheat was strewn, and when the sparows have finished their final mea?

rows have finished their final mea; sweep up the remaining poisoned grains and desuroy them.

Here is a recipe for the stuff. Mix a dracium of strychnia with three quarts of boiling water. Let the mixture boil until the poison is dissolved. Put enough wheat mit the poisoned water to absorb it; then put the mixture aside for forty-eight hours. The wheat will be found to have swollen greatly. Spread it over the bottom of a pan and place it in an oven to dry, but be sure it does not sorrch. The sparrows will like wheat prepared in this way. There is no cruelty in their this way. There is no cruelty in their

this way. There is no crueity in their Elling. Death is swift and painless. After having killed your sparrows get ready to welcome your friends of the spring. If you live in the city, and have large grounds, you may hope to have nearly all the feathered friends about you that your country cousins can claim, but if you have merely the ordinary city back yard your visitors will be few though they are likely to be interesting. If you live in a flat you can have but one kind of bird neighbor, and he will be a roof dweller, for whom you must prepare a box, and make certain that the other tenants of the flat building will not interfere with his housekeeping arrangements. BOX FOR PURPLE MARTINS.

BOX FOR PURPLE MARTINS.
The purple martin (Progne subis) is a housebuilding bird, and something of his habits have been told before. If you have a good sized yard, put your box on a pole about twenty-five feet high If it be necessary to go aloft for a site, raise the house about four feet above the roof. You mart provide as many apartments in your martin house as you wish. The birds live in colonies, and as a matter of fact with the martin it seems to be a case of the more the merrier. Have each compartment about seven inches from front to rear, at least six inches from front to rear, at least six inches from front to rear, at least six inches high and five inches in width. The entrance hole, preferably, should be made midway between the top and bottom of the front, and it should be about the size of a silver half-dollar. Reep the sparrows away, and thankers are that in early April pioneer martins will be examining the premises, and if satisfied with the arrangement you and follow the size of a silver half-dollar entrance has been took of the front and it should be about the size of a silver half-dollar entrance hole, prefer and solve your roof tree. If you catch a glimpse of his livery of black and gold in the early May days, throw and gold in the early May days, throw find them, and ere long this beauty may find them, and ere long this least note at night is likely to have a touch of complaint in that he's too sleepy to sing any long.

BLUEBIRD. ORIOLE AND ROBIN.

The bluebird will bring a bit of the sky to you will but bid him welcome. The older will be back in the early spring it you will but bid him welcome? The older will be back in the early spring it to you will but bid him welcome? The ol

will be occupied before May day by de-HOME FOR THE WREN

strable tenants.

HOME FOR THE WREN.

Persons who have yard room and some shrubbery can get the wren and the oluebrd as neighbors if they will make a little preparation for them the coming winter. The wren will nest in aimost any kind of box, but, of course, he likes to have things well arranged. A small keg such as anchovies are sometimes packed in makes a good wren home. A wren is a mite of a creature, but he likes tonsiderable room, and his apartment should be slightly larger than that provided for the martin. Do not expect, however, two pairs of wrens to live in the same box, even though it be divided into compartments. They won't, or if they do they'll be so busy fightling that they'll forget to lay eggs.

Make the entrance hole into the wren home midway between the top and bottom of one end of the box or keg. Make it exactly the size of a silver quarter. If you do this the wren is safe from the attacks of the bluebird and English sparrow.

It is nothing short of cruelty perhage.

the attacks of the bluebird and English sparrow.

It is nothing short of cruelty perhaps to give the wren too big a box for his home. He and his wife seem to feel induty bound to fill with twigs whatever place they choose for their dwelling, and if you gave them a dry goods box they

swaying tree boughs.
You may have the robin and the phoebe under the roof of your porch, for bo hitses birds when certain they will not be disturbed, love to build on the tops of the porch pillars under the cover of the most.

the porch pillars under the cover of the roof.

Plant shrubbery in the corner of your yard and don't keep it too well trimmed. Heap a pile of brush in one corner. You can make the rest of your yard so attractive that people will forgive a bit of seeming neglect. The brush makes a good hiding place for the birds. Sink a yan into the turf in the center of the yard and fill it with fresh water twice a day. Do these things and it makes little difference where you live, the birds will find you out and stay with you and if the same conditions prevail, they will come back each spring with the south wind and sing at your window.

(Special to The Times-Dispatch) STAUNTON, VA. Oct. 3-Mr. J. P. Kiser, of this county, and Miss Little

A HOME FOR THE PURPLE MARTINS.

would probably work from April to October in the effort to fill the thing up before they gave a thought to matter of progeny. Do not put a perch outside the hole of the wren's home. The bird doesn't need it, and the perch affords a resting-place for the English sparrow, who can get his head through the entrance and do some mischief, even though his body is too big to follow. If you don't like music, incessant music, don't notic the wren to be a neighbor. He will sing from 3 A. M. to 8 P. M. all through the nesting season, and his last note at night is likely to have a touch of complaint in it, that he's too sleepy to sing any longer.

BRISTOL, VA., Oct. 2.—Professor Utermoehler, the accomplished musician, who was formerly director of music at Martha Washington College, Abingdon, Va., has been elected to a similar position in the faculty of Sullins College for Young Ladles, in this city.

He has accepted and will enter upon the duties of the position next week.

GAY WEEK AT HOT SPRINGS

Two Richmond Belles Figure Prominently There.

A BABY DRESS BALL

A Unique Affair in Which the Gowns Were Infantile, and the Entertainment Ended With a Plunge in the Swimming Pool.

(Special to The Times-Dispatch.)

HOT SPRINGS, VA., Oct. 3.—This has been a very gay week at the Virginia Hot Springs, and two young Richmond belies have figured prominently in all the social life of the resort. They are Miss Ella Bosher, who has lately returned from Europe, and Miss Kate Harris. ris.
On Tuesday Mrs. James Ross Todd, of

turned from Europe, and Miss Kate Harris.

On Tuesday Mrs. James Ross Todd, of Louisville, gave a coaching party to the Cascade, where her guests had tea on the rocks. Some of them went in the coach, while a large number followed on horsehack. Miss Kate Harris had the box seat of the coach. Others in the party were Miss Bosher and Lewis Ginter Young, of Richmond; Minister Christopher Hauge, of Sweden (from Washington); Miss Ethel Lewis, of Philadelphia; Mr. and Mrs. J. Bradley Cummings, Mr. Lincee Blagden, Mr. Pudolph Neeser, Mr. Dwight W. Taylor and Mr. Cecil Barret, of New York; Mr. Joseph Burnett, of Cambridge; Miss Laura Smith and Mr. Dallas Byers, of Pittsburg; Miss Menie, of New Orleans, and Mr. 2nd Mrs. Frederic Sterry.

Miss Ethel Lewis, of Philadelphia, gave a fancy dress ball Tuesday night at the club house, when the guests, all dressed as "bables." Miss Harris and Miss Bosher were the prettiest "little gris" of the party. They wore white dresses langing to the ankles, with sashes, and hair in loose curls. Miss Bosher wore a "baby hat" of, white lace. The others wore ridiculous costumes, one of the funniest being that of Miss Laura Smith, of Pittsburg, who represented "Sis Hopkuns." Mr. Lewis Ginter Young was dressed as a girl, and carried off his honors very well. Mrs. Henry Iewis chaperoned the party, and a number of prominent guests were present. After the refreshments and dancing the participants went to the swimming pool at midnight, where they had a lot of sport diving and swimming for a half hour before dispersing. The whole thing was quite original, and a duplicate of the party given by Miss Lewis at Narragansett Pier last summer.

Mrs. Albert Young and—her daughter, Miss Arents of Richmond, have been at the Homestead for the past week. Miss Arents wars some exquisite gowns. As its usually the case with Virginia women, Miss Arents is a fine horswoman. (She is a niece of the late Major Ginter, I believe.)

Mr. and Mrs. John D. Fotts were here this week from Richmond, where Mr.

Mr. and Mrs. John D. Potts were here this week from Richmond, where Mr. Potts is passenger agent for the Chesa-peake and Ohio Railroad. He was given arive in the coach of Mr. James Ho-

bart Moore.

HIGH CLASS DRUGGISTS

AND - OTHERS.

The better class of druggists, everywhere, are men of scientific attainments and high integrity, who devote their lives to the welfare of their fellow men in supplying the best of remedies and purest medicinal agents of known value, in accordance with physicians' prescriptions and scientific formula. Druggists of the better class manufacture many excellent remedies, but always under original or officinal names and they never sell false brands, or imitation medicines. They are the men to deal with when in need of anything in their line, which usually includes all standard remedies and corresponding adjuncts of a first-class pharmacy and the finest and best of toilet articles and preparations and many useful accessories and remedial appliances. The earning of a fair living, with the satisfaction which arises from a knowledge of the benefits conferred upon their patrons and assistance to the medical profession, is usually their greatest reward for long years of study and many hours of daily toil. They all know that Syrup of Figs is an excellent laxative remedy and that it gives universal satisfaction, and therefore they are selling many millions of bottles annually to the well informed purchasers of the choicest remedies, and they always take pleasure in handing out the genuine article bearing the full name of the Company-California Fig Syrup Co.-printed on the front of every puckage They know that in cases of colds and headaches attended by biliousness and constipation and of weakness or torpidity of the liver and bowels, arising from irregular habits, indigestion, or over-eating, that there is no other remedy so pleasant, prompt and beneficial in its effects as Syrup of Figs, and they are glad to sell it because it gives universal satisfaction.

Owing to the excellence of Syrup of Figs, the universal satisfaction which it gives and the immense demand for it, imitations have been made, tried and condemned, but there are individual druggists to be found, here and there, who do not maintain the dignity and principles of the profession and whose greed gets the better of their judgment, and who do not hesitate to recommend and try to sell the imitations in order to make a larger profit. Such preparations sometimes have the name—" Syrup of Figs"—or "Fig Syrup" and of some piratical concern, or fictitious fig syrup company, printed on the package, but they never have the full name of the Company—California Fig Syrup Co.—printed on the front of the package. The imitations should be rejected because they are injurious to the system. In order to sell the imitations they find it necessary to resort to misrepresentation or deception, and whenever a dealer passes off on a customer a preparation under the name of "Syrup of Figs" or "Fig Syrup," which does not bear the full name of the California Fig Syrup Co. printed on the front of the package, he is attempting to deceive and mislead the patron who has been so unfortunate as to enter his establishment, whether it be large or small, for if the dealer resorts to misrepresentation and and deception in one case he will do so with other medicinal agents, and in the filling of physicians' prescriptions, and should be avoided by every one who values health and happiness. Knowing that the great majority of druggists are reliable, we supply the immense demand for our excellent remedy entirely through the druggists, of whom it may be purchased everywhere, in original packages only, at the regular price of fifty cents per bottle, but as exceptions exist it is necessary to inform the public of the facts, in order that all may decline or return any imitation which may be sold to them. If it does not bear the full name of the Company-California Fig Syrup Co.—printed on the front of every package, do not hesitate to return the article and to demand the return of your money, and in future go to one of the better class of druggists who will sell you what you wish and the best of everything in his line at reasonable prices.

BIGGEST TRIBUTE TO WATER MELONS

Darkies from Church "Take" Them and Sing "Nearer,

My God, to Thee." Out at Richmond College Thursday night Dr. W. R. L. Smith, pastor of the Second Baptist Church, told a good story which he had heard from Dr. Charles H. Ryland, secretary of the college Dr. Ryland has a flourishing little church out in the country and Sunday mornings he goes out there and preaches returning in afternoon. Last Sunday as he was making his way comfortably back to the city in his buggy, he over-took a wagon loaded with colored peotook a wagon loaded with colored people. of almost all ages. They were evidently returning from church. People who live in the country know that darkies go to morning services about 12:30 P. M. and come away between 3 and 5 o'clock. The wagon in front of the Doctor was logsing along and evidently no one in it had seen the minister. Presently a watermeior patch came into view. The colored people spied it at once and before the wagon stopped two young bucks had salled out and were soon gathering up several of the largest and best. Dr. Ryland was amused. He was astonished, as well, when, as soon as the melons were safely out of sight in the wagon, every man and woman in it, began to sing at the top of his voice, "Nearer, My God, to Thee."

TRINITY COLLEGE

Southern Association to Meet There in November. (Special to The Times-Dispatch

key business. The bar-rooms of the city are confined within a radius of five blocks, directly under the eyes of the police. There are none near a church, theatre, park or any public place of worship of entertainment. They are also closed at

815 East Franklin.

TERRAPIN FROM JAPAN

Over There They Are Raised in Pens and We Want to Know How.

The United States Fish Commission as sent an expert to Japan for the purpose of studying terrapin culture as practiced in that country, where they seemed to have succeeded in breeding the turtles by artifice.

It is true that the Japanese terrapin is not the same species as ours, but its habits are similar, and there is reason to suppose that like methods of culture night be successful in the United States. The matter is of no small importance inasmuch as our terrapin is on the verge of extinction. It used to be vastly numerous, especially in the neighborhood of the Chesapeake. and in 1850 diamondbacks sold in Baltimore for 12 1-2 cents apiece.
But they have been literally hunted almost to the point of extermination, and at the present time they fetch 80 a dozen.

and at the present time they fetch \$80 a dozen.

The Japanese species, which is said to be equal to our own in flavor, is known as the "suppon," and, like the American terrapin, is an inhabitant of tidal rivers and sait marshes.

Atthicial ponds, with a inuddy bottom, are employed for rearing purposes, with a low fence to prevent the turtler from escaping. The pond is shallow, and at laying time, in early summer, the females climb out on the bank, scratch a shallow hole and deposit their eggs, inally covering them up and leaving them to be hatched by the heat of the sun.

Nets are spread to prevent birds from digging up the eggs.—New York Herald.
