The convention instructed the committee to consider resolutions by Sol Wexler, of this city, chairman of the bills lading committee of the New Orleans Cotton Exchange, offered in lieu of the report. The motion also provided that Mr. Wexler be made a member of the bills lading committee in addition to another Southern banker to be selected later.

Mr. Wexler, in reviewing the entire question, stated that the bureau plan had been visponesty opposed by the cotton exchanges of mouston. Memphis, Savannah, Vicksburg, Austin and other organizations, giving the reason that it singled out cotton from the other vast commodities snipped abroad, and that it cast a stigma upon the honest cotton dealers or a large section of the country.

What we are mostly concerned in, he said, its making the ratirpads responsible for the acts of their agents. The central bureau is supported largely by the railroads. Why? Because they have read the handwriting on the wall, and they know it this bureau is not established they will be held responsible for the acts of their agents.
