

\$99 Office Visit

The effectiveness of those little blue pills can decrease over time.

We offer Erectile Dysfunction treatments that work for the long run.

ED is a medical condition caused by a range of health conditions, such as diabetes, prostate problems and vascular disease.

For over eight years the St. Louis Men's Clinic has created customized treatment plans using state-of-the-art medicine and technology to identify and treat what impacts your sexual performance.

Your Office visit includes:

- Measuring your testosterone and PSA levels.
- Developing a customized ED treatment plan supervised by one of our doctors.
- *Results during your first visit, or no charge*

Call us today and receive a confidential consultation.

You have nothing to lose and everything to gain!
