HIGH CONCENTRATIONS OF LOW-INCOME HOUSING

The dots on the map below show developments that received some form of financing through the Missouri Housing Development Commission, typically in the form of low-income housing tax credits. Dots vary in size based on the number of units in the development.*

Number of units per development

200+ | 175-199 | 150-174 | 125-149 | 100-124 | 75-99 | 50-74 | 25-49 | 0-24

Median Household Income

$35,000 | $45,000 | $55,000 | $65,000 | $75,000

* Some dots appear at the center of a neighborhood or municipality because they include properties in various nearby locations. Two developments are excluded because their properties are scattered across a broad geographic area.

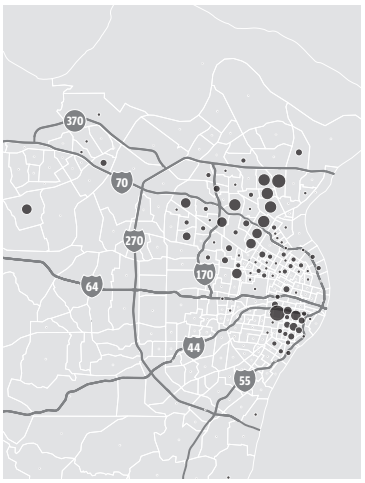
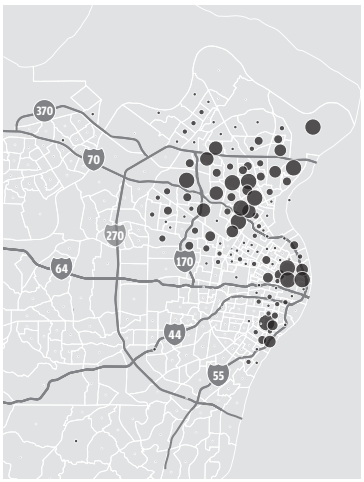
SECTION 8 VOUCHERS EXPAND

The following map shows where Section 8 housing choice vouchers are used at the census tract level. A larger marker indicates a greater number of rental units in which the tenant has a voucher.*

1996



2013



* Based on data estimates — not exact figures — provided by the U.S. Department of Housing and Urban Development. Other rental subsidy programs not included.
