

## **Petition to the Special School District Board of Education**

### **Ensure Safety and Full Support of All Students**

As parents, guardians, and community members, we are united by one shared belief: **every child deserves to learn in a safe, supportive environment and to receive the services they are promised.**

We are deeply concerned that current conditions within the Special School District (SSD) are putting both student safety and educational quality at risk. Our children — and the educators who serve them — deserve better.

Across our schools, there are growing challenges that make it harder to meet students' needs effectively and safely. These include staff shortages, unmet service minutes, and environments where students' safety and learning opportunities are compromised. When students do not receive the support guaranteed by SSD, it affects not only their progress but also the well-being of every classroom community.

We are calling on the SSD Board of Education to take **immediate and transparent action** to:

1. **Ensure adequate staffing levels** so that all students receive their required services consistently and safely.
2. **Prioritize student and staff safety** by addressing unsafe conditions and ensuring support and adequate supervision.
3. **Engage openly with families and educators** to rebuild trust and collaboratively find solutions that truly serve students' best interests.

We believe that when SSD fulfills its commitments, every child benefits — academically, emotionally, and socially. Together, we can uphold the promise of equitable, high-quality education for all students.

**We urge the Board to act swiftly and decisively to protect our students and restore confidence in SSD's mission to serve every child well.**

**Signed,**

Concerned Stakeholder of SSD
