

# 7 tips for VIRTUAL DATING

COX

1 >

**Check your device's camera, microphone and Internet connection** ahead of time. You don't want a technical glitch during a great conversation.

2 >

**Note the start time** and sign in a few minutes beforehand. Just like an in-person date, punctuality matters!

3 >

**Pay attention to the background and lighting** in your room. Tidy up, avoid noisy spaces and make sure the lighting isn't too dark or washes you out.

4 >

**Dress up a bit**, fix your hair and put on some makeup. It doesn't have to be formal, but these steps can make you feel more confident and prepared to meet new people.

5 >

**Write down a few questions** ahead of the date. Also, pay attention to items behind the person, like photos and artwork. Asking about these can lead to great conversations.

6 >

**Keep your device at eye level** to avoid awkward or unflattering angles.

7 >

**Be authentic and open.** You don't need to spill all during the first chat, but being honest and transparent will help you determine if you've made a new connection.
