RE: Commercial SWD Well and Facility Permit Application
    St. Landry Parish, La.

Dear Mr. Daigle:

    Louisiana saltwater injection (disposal - SWD) wells must meet the strict requirements of the Louisiana Underground Injection Control (UIC) program, as administered by the Department of Natural Resources, Office of Conservation, under Statewide Order No. 29-B. The UIC program was delegated to Louisiana by the United States Environmental Protection Agency in 1982 under the provisions of the Safe Drinking Water Act of 1974. The goal of the UIC program is to protect all Underground Sources of Drinking Water. Accordingly, a permit to operate the SWD well and facility in question will only be granted if the Office of Conservation determines the application complies with all statutorily mandated requirements. Eagle Oil, LLC believes its application does comply with all such regulations and it respectfully awaits the final decision of the Office of Conservation.

With Kind Regards,

Eagle Oil, LLC
