

ACTS OF 2022 LEGISLATURE

Acts 117-144

ACT No. 117

HOUSE BILL NO. 2 BY REPRESENTATIVE BISHOP AN ACT

To provide with respect to the capital outlay budget and the capital outlay program for state government, state institutions, and other public entities; to provide for the designation of projects and improvements; to provide for the financing thereof making appropriations from certain sources; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1. The following sums or so much thereof as may be necessary are hereby appropriated out of any monies in the state treasury from the sources specified, from federal funds and self-generated revenues belonging to the state of Louisiana and/or collected by boards, commissions, departments, and agencies thereof, all for making capital outlay and for the purposes and in the amounts specified herein for the Fiscal Year commencing July 1, 2022, and ending June 30, 2023, subject to the conditions thereafter provided:

A project with funding payable from General Obligation Bonds Priority 1 indicates that the funding for the project includes the reauthorization of funding which was previously granted as a line of credit by the State Bond Commission in Fiscal Year 2021-2022. As used in this Section, the term “general obligation bonds” means state general obligation bonds or other evidences of indebtedness payable from the Bond Security and Redemption Fund. The amount set forth in this Section opposite each project, or so much thereof as may be necessary, is hereby appropriated and payable from the source of funding indicated; provided, however, amounts appropriated and payable from federal funds may be encumbered or expended only to the extent such amounts shall have been committed or received. Pursuant to the provisions of R.S. 39:82, funds for planning, acquisition, construction, and major repair projects appropriated by this Act may be retained until completion of the project, even if no bona fide liability exists on the last day of the fiscal year.

This Act shall constitute the comprehensive state capital outlay budget for the 2022-2023 Fiscal Year. Projects set forth which are payable from the proceeds available from the sale of general obligation bonds shall have the priorities as indicated. The Request for Line of Credit form used by the attorney general and Bond Counsel in evaluating Louisiana Constitutional, Internal Revenue Code, and applicable income tax regulations shall be filed with the commissioner of administration, State Bond Commission, and state attorney general. No general obligation bond cash lines of credit shall be granted to fund any lower priority project prior to the granting of general obligation bond cash lines of credit to fund all higher priority projects (the “general rule”), except as hereinafter provided. This prohibition against funding a lower priority project shall not apply upon a showing of an impossibility or impracticality either to proceed with all unfunded higher priority projects or to proceed with the funding of such projects or any part thereof through the issuance of general obligation bonds for any reason. Such showing shall be stated in reasonable detail in a certificate or certificates signed by the state agency responsible for administering the funding, and filed with the commissioner of administration and the State Bond Commission (hereinafter referred to as “the Commission”). Upon a determination by the Commission that proceeding with such a project or the funding thereof through the issuance of general obligation bonds is impractical or impossible, the Commission may then proceed with the sale of general obligation bonds or the granting of cash lines of credit without regard to the priority of the unfunded projects determined to be impossible or impractical.

Upon recommendation by the state agency responsible for administering the funding, if it is determined at any time that proceeding with the project or with the funding thereof is no longer impossible or impractical, the State Bond Commission may rescind the certificate of impossibility or impracticality and may proceed with the project or with the issuance of general obligation bonds or the granting of cash lines of credit to fund the project. Alternatively, the Interim Emergency Board (hereinafter referred to as “the Board”), upon reviewing certificates as described above and determining that proceeding with such projects or the funding thereof through the issuance of general obligation bonds is impossible or impractical, may designate a lower priority for such projects. The Board’s determination and lower priority designation shall be submitted to the members of the legislature for their approval in accordance with the provisions of Chapter 3-B of Subtitle I of Title 39 of the Louisiana Revised Statutes of 1950. In accordance with the provisions of Chapter 3-B of Subtitle I of Title 39 of the Louisiana Revised Statutes of 1950,

whenever at the written request of the appropriate legislators and agency, the Board determines that an adjustment to a project description originally set forth in such capital budget adopted by the legislature for a current fiscal year is necessary to correct a mistake in a project description, clarify a description, change the scope of a description, or make any other adjustment the Board deems necessary to implement the purpose of the project, such adjustment shall become effective only upon the approval by majority vote of the elected members of each house of the legislature in the manner provided for in Chapter 3-B of Subtitle I of Title 39 of the Louisiana Revised Statutes of 1950.

If such approval is granted, notification by the chair or secretary of the Board of the results of the balloting shall be transmitted to the State Bond Commission, which may then proceed with the sale of general obligation bonds or the granting of cash lines of credit for each change approved upon request of the commissioner of administration in accordance with the general rule.

With respect to Priorities 1 through 5, a lower priority project may be moved to a higher priority only upon a showing of an emergency or other cause not reasonably anticipated by the legislature, which shall be stated in reasonable detail in a certificate signed by the head of the appropriate department, political subdivision, or agency and filed with the commissioner of administration and the Board. Upon a determination by the Board that such project should be moved to a higher priority because of an emergency or other cause not reasonably anticipated by the legislature, the Board shall designate a higher priority to the project. The matter then shall be submitted to and be subject to the same approval by the members of the legislature in the manner previously indicated in this Section. If such approval is granted, notification by the chair or secretary of the board of the change of priority shall be transmitted to the State Bond Commission, which then upon request of the commissioner of administration, may proceed with the sale of general obligation bonds or the granting of cash lines of credit in accordance with the general rule. As to projects within a priority, the State Bond Commission acting on requests submitted by the commissioner of administration shall determine when such project, or phases thereof, shall be funded. In making such determination, the State Bond Commission shall consider the amount of proceeds of general obligation bonds to be made available in light of money and capital market conditions; the expenditure requirements of the project; the time required for architectural plans and drawings, public bidding, and site acquisition and preparation; availability of receipt of federal monies; litigation affecting the undertaking or completion of a project; federal tax laws and regulations regarding the sale of municipal bonds; and other items of a similar nature bearing upon the possibility or the necessity to commence a project or any particular phase thereof.

Any other provision of this Act to the contrary notwithstanding, projects described in Priority 5 of this Act shall not be moved to a higher priority except upon one of the following conditions: (1) Funding is necessary to complete or additionally fund a project located elsewhere in the Capital Outlay Act. Determination of such condition shall be made by the head of the appropriate department or agency by means of a certificate to that effect filed with the Interim Emergency Board, who shall, by mail ballot, request approval of such change and if approved by a majority of each house of the legislature it shall be funded, or (2) unless required by an emergency or other cause not reasonably anticipated by the legislature, to be in accordance with procedures set forth in this Section. However, the State Bond Commission may authorize a non-cash line of credit for any project in Priority 5 which represents that portion of construction contracts which were let during a previous fiscal year, or construction contracts which will be let during the current fiscal year, but which will not require cash expenditures during the year. Such non-cash lines of credit, when combined with previously sold bonds or with higher priority bonds or lines of credit, or with funds appropriated from other sources, will provide sufficient appropriated funds to award equipment or construction contracts. Contracts shall not be awarded without approval of the division of administration.

Upon approval by the State Bond Commission, and subject to compliance with its policies and procedures and the procedures set forth herein, a line of credit providing for the use of funds in anticipation of the sale of general obligation bonds may be granted to the appropriate administering agency or department from the Comprehensive Capital Outlay Escrow Account, or if there is not a sufficient amount available in such account, from other available state cash in the state treasury, for capital improvement projects for which bond proceeds are appropriated by a current capital budget, prior to the actual issuance of bonds for such projects, unless the attorney general advises that an impediment exists to the valid issuance of the bonds on the date such line of credit is granted.

All bonds that are to be repaid, in whole or in part, by revenues generated by the project shall be designated as “Reimbursement Bonds.” The State Bond Commission shall enter into such agreements as are necessary to provide that the agency or subdivision, whose project is reimbursable, shall pay the bond debt costs into the Bond Security and Redemption Fund. Such costs may be paid annually or at the end of the term of the bonds issued as determined by the State Bond Commission.

Priority 1 general obligation bond funding shall be limited to:

(1) Projects and amounts which were previously authorized by Act 485 of the 2021 Regular Session of the Legislature; and which were granted cash lines of credit by the State Bond Commission. The bonds to fund these projects were not sold in Fiscal Year 2021-2022.

(2) The reauthorization of the portion of the outstanding Fiscal Year 2021-2022 Priority 5 Non-Cash Lines of Credit for projects which will require cash expenditures in Fiscal Year 2022-2023 and therefore must be converted to Cash Lines of Credit in Fiscal Year 2022-2023.

(3) Commitments made in the Higher Education Desegregation Settlement Agreement.

Priority 2 general obligation bond projects are for the completion of plans and specifications, land acquisition, site preparation, or for construction which will begin during the fiscal year. It is presently anticipated that the listed projects will require the sale of bonds or extension of lines of credit during the fiscal year after adoption of this Act.

Priority 3 general obligation bond projects are for the preparation of plans and specifications, land acquisition, site preparation, or for construction and shall be limited to funding for the portion of construction contracts which will not require cash expenditures during the fiscal year. The projects in this category shall be considered future year projects in the state’s five-year capital outlay plan. It is presently anticipated that the listed projects will not require the sale of bonds or extension of lines of credit during the fiscal year. Priority 4 general obligation bond projects are for the preparation of plans and specifications, land acquisition, site preparation, or for construction and shall be limited to funding for the portion of construction contracts which will not require cash expenditures during the fiscal year. The projects in this category shall be considered future year projects in the state’s five-year capital outlay plan. It is presently anticipated that the listed projects will not require the sale of bonds or extension of lines of credit during the fiscal year.

Priority 5 general obligation bond funding shall be limited to funding for the portion of construction contracts which will not require cash expenditures during the fiscal year. These funds, when combined with previously sold bonds or with higher priority bonds on lines of credit, or with funds appropriated from other sources, will provide sufficient appropriated funds to award contracts. Non-cash lines of credit shall be required prior to the award of these contracts.

In accordance with the cash management plan adopted pursuant to R.S. 48:251(D) and the provisions of Act 161 of the 1998 First Extraordinary Session, the Department of Transportation and Development is authorized to enter into contracts or agreements for projects approved pursuant to the Highway Priority Program, Airport Construction and Development Priority Program, Port Construction and Development Priority Program, and Statewide Flood Control Program for projects bid and awarded, authorized, or commenced during the fiscal year which do not require cash expenditures for the full contract or agreement amount.

The legislature hereby recognizes that the Constitution of Louisiana provides in Article VII, Section 11, that the governor shall present to the legislature a five-year Capital Outlay Program and request implementation of the first year of such program, and that the capital outlay projects approved by the legislature are to be made part of the comprehensive state capital budget which shall, in turn, be adopted by the legislature. Further, all projects in such budget adopted by the legislature requiring bond funds must be authorized as provided in Article VII, Section 6 of the Constitution of Louisiana. The legislature finds that over a period of years the legislature has enacted numerous bond authorizations, but due to inflation and the requirements of specificity of amount for each project, impossibility, or impracticability, many of the projects cannot be undertaken. All of the unissued bonds must be listed in the financial statements of the state prepared from time to time and in connection with the marketing of bonds, and are taken into account by rating agencies, prospective purchasers, and investors in evaluating the investment quality and credit worthiness of bonds being offered for sale. The continued carrying of the aforesaid unissued bonds on the financial statements of the state under the above described circumstances operates unnecessarily to the financial detriment of the state. Accordingly, the legislature deems it necessary and in the best financial interest of the state to repeal all Acts, except any Act authorizing the issuance of refunding bonds and Act 41 of the 2006 First Extraordinary Session, providing for the issuance of general obligation bonds in the state which cannot be issued for the projects contemplated, and in their stead to reauthorize general obligation bonds of the state for those projects deemed to be essential, and to authorize new projects.

Section 2. It is the intent of the legislature that this Act shall constitute the Omnibus Bond Authorization Act of 2022 and, together with any Act authorizing the issuance of refunding bonds and Act 41 of the 2006 First Extraordinary Session, shall provide bond authorization, as required by Article VII, Section 6 of the Constitution of Louisiana, for those projects to be funded totally or partially by the sale of general obligation bonds and included in House Bill No. 2 of the 2022 Regular Session as finally enacted into law (2022 Capital Outlay Act). It is the further intent of the legislature that in this year and each year hereafter an Omnibus Bond Authorization Act shall be enacted providing for the repeal of state general obligation bond authorizations for projects no longer found feasible or desirable, the reauthorization of those bonds not sold during the prior fiscal year for projects deemed to be of such priority as to warrant such reauthorization, and to enact new authorization for projects found to be needed for capital improvements.

Section 3. Except as hereinafter provided, all prior Acts of the legislature authorizing the issuance of general obligation bonds of the state of Louisiana shall be and the same are hereby repealed in their entirety. This repeal shall not be applicable to any Act providing for the issuance of refunding bonds nor to Act 41 of the 2006 First Extraordinary Session, and such Acts shall remain in full force and effect and shall not be affected by the provisions of this Act. In addition, the repeal shall not in any manner affect the validity of any bonds heretofore issued pursuant to any of the bond authorizations repealed hereby. Section 4. To provide funds for certain capital improvement projects the State Bond Commission is hereby authorized pursuant to Article VII, Section 6 of the Constitution of Louisiana to issue general obligation bonds or other general obligations of the state for capital improvements for the projects, and subject to any terms and conditions set forth on the issuance of bonds or the expenditure of monies for each project as is provided for in the 2022 Capital Outlay Act.

Section 5.(A) To provide funds for certain capital improvement projects authorized prior to this Act and by this Act, which projects are designed to provide for reimbursement of debt service on general obligation bonds, the State Bond Commission is hereby authorized pursuant to Article VII, Section 6 of the Constitution of Louisiana, to issue general obligation bonds of the state, hereinafter referred to as “project bonds”, for capital improvements for the projects and subject to any terms and conditions set forth on the issuance of bonds or the expenditure of monies for each such project as provided in the 2022 Capital Outlay Act the terms of which require such reimbursement of debt service.

(B) Without affecting, restricting, or limiting the pledge herein made of the full faith and credit of the state of Louisiana to the payment of the general obligation bonds authorized by this Section and without affecting, restricting, or limiting the obligation of the state to pay the same from monies pledged and dedicated to and paid into the Bond Security and Redemption Fund, but in order to decrease the possible financial burden on the general funds of the state resulting from this pledge and obligation, the applicable management board, governing body, or state agency for which any of such project bonds are issued, in the fiscal year in which such project bonds are issued and in each fiscal year thereafter until such project bonds and the interest thereon are paid, shall transfer and make available to the state treasury, for deposit in the Bond Security and Redemption Fund, designated student fees or revenues or other revenues in an amount equal to the debt service on such project bonds in such fiscal year. In addition, the applicable management board, governing body, or state agency, in the fiscal year in which such project bonds are issued and in each of the nine immediately succeeding fiscal years thereafter, shall transfer and make available to the state treasury from designated student fees or revenues or other revenues, for credit to a reimbursement reserve account for such project bonds which shall be established in an account designated in the reimbursement contract hereafter provided for, monies in an amount equal to one-tenth of the average annual debt service on such project bonds, and each such reimbursement reserve account thereafter shall be maintained in said minimum amount by further transfers, if necessary, from designated student fees or revenues or other revenues by the applicable management board, governing body, or state agency to the state treasury. Each such reimbursement reserve account shall be used, if necessary, solely to make the reimbursement payments herein obligated to be made to the state treasury. When the general obligation bonds and the interest thereon issued hereunder have been paid, an amount remaining in the reimbursement reserve account, as prorated to such authorized project, shall be transferred by the state treasurer to the applicable management board, governing body, or state agency.

(C) No project bonds authorized by this Section shall be issued for any authorized project unless and until a reimbursement contract has been entered into and executed between the applicable management board, governing body, or state agency and the State Bond Commission pertaining to the reimbursement payment and reimbursement reserve account payments for such project. The contract shall require payment into the state treasury of designated student fees or revenues or other revenues in an amount sufficient to reimburse the cost to the state of the principal, interest, and premium, if any, obligated to be paid by the state on such project bonds. The State Bond Commission shall not be required to execute any such reimbursement contract unless the estimates and projections of the designated student fees or revenues or other revenues available for payment into the state treasury thereunder for the authorized projects are sufficient to reimburse the costs of the principal, interest, and premium, if any, on the project bonds. A reimbursement contract hereunder shall be authorized by resolution of the applicable management board, governing body, or state agency, or board or by act of the chief executive officer if no governing board exists. This authorization shall provide for the dates, amounts, and other details for the payments required to be made to the state treasury and for the reserve account. The authorization may contain such covenants with the State Bond Commission regarding the fixing of rates for fees and charges or revenues and such other covenants and agreements with the State Bond Commission as will assure the required payments to the state treasury. The contract shall be subject to approval by the Office of the Attorney General and the State Bond Commission and, when so accepted and approved, shall conclusively constitute and be the reimbursement contract for an authorized project, as required hereunder.

(D) The obligation to make the reimbursement payments as required by a reimbursement contract may be represented by the issuance by the applicable management board, governing body, or state agency of its nonnegotiable revenue obligation in the form of a bond or other evidence of indebtedness, hereinafter referred to as “reimbursement bond”. The reimbursement bond shall be issued in a single bond form, without coupons, in the principal amount equal to the aggregate principal amount of project bonds, shall be registered in principal and interest in the name of and be payable to the State Bond Commission, shall bear interest at a rate or rates equal to the interest rate or rates payable on the project bonds, and shall be payable as to principal and interest at such times, in such manner, from designated student fees or revenues, or other revenues, and be subject to such terms and conditions as shall be provided in the authorizing resolution or document executed by a chief executive officer, where applicable. This authorization shall be subject to approval by the State Bond Commission and the Office of the Attorney General, and when so accepted and approved, the authorization shall constitute and be the reimbursement contract for such authorized project, as required hereunder. The reimbursement bonds authorized under the provisions of this Section may be issued on a parity with outstanding reimbursement bonds of the applicable management board, governing body, or state agency, or issued on a subordinate lien basis to outstanding bonds, or a combination thereof, and may include and contain such covenants with the State Bond Commission for the security and payment of the reimbursement bonds and such other customary provisions and conditions for their issuance by the applicable management board, governing body, or state agency as are authorized and provided for by general law and by this Section. Until project bonds for an authorized project have been paid, the applicable management

board, governing body, or state agency shall impose fees and charges in an amount sufficient to comply with the covenants securing outstanding bonds and to make the payments required by the reimbursement contract.

(E) In addition to the other payments herein required, reimbursement contracts shall provide for the setting aside of sufficient student fees or revenues or other revenues in a reserve fund, so that within a period of not less than ten years from date of issuance of project bonds there shall be accumulated in a reserve fund monies equal to a sum not less than the average annual debt service requirements on such project bonds. Monies in the reserve fund shall be used for the purpose of remedying or preventing a default in making the required payments under a reimbursement contract. The reserve fund required hereunder may consist of a reserve fund heretofore or hereafter established to secure payments for reimbursement bonds of the applicable management board, governing body, or state agency, provided that (1) payments from said reserve fund to secure the payments required to be made under a reimbursement contract shall be on a parity with the payments to be made securing outstanding bonds and additional parity bonds and (2) no additional parity reimbursement bonds shall be issued except pursuant to the establishment and maintenance of an adequate reserve fund as approved by the State Bond Commission.

(F) When the balance of reimbursement bond proceeds, for a project, are allocated to another project, the State Bond Commission is authorized to make the appropriate amendment to the reimbursement contract with the agency making the reimbursement payments.

Section 6. The bonds authorized to be sold by the State Bond Commission pursuant to this Act shall be issued and sold in conformity with the provisions of Article VII, Section 6 of the Louisiana Constitution, R.S. 39:1361 through R.S. 39:1367, and R.S. 39:1401 through R.S. 39:1430.1, and any amendments thereto adopted prior to, at the same time as, or subsequent to, the effective date of this Act. However, the provisions of R.S. 39:1365(9) shall not apply to any bonds issued hereunder in the form of variable rate and/or tender option bonds and that said bonds need not be issued in serial form and may mature in such year or years as may be specified by the State Bond Commission. Should any provision of this Act be inconsistent with any provision of the Louisiana Revised Statutes of 1950, the provision of this Act shall govern. In connection with the issuance of the bonds authorized hereby, the State Bond Commission may, without regard to any other laws of the state relating to the procurement of services, insurance, or facilities, enter into contracts upon such terms as it deems advantageous to the state for (1) the obtaining of credit enhancement or liquidity devices designed to improve the marketability of the bonds and (2) if the bonds are structured as variable rate and/or tender option bonds to provide the services and facilities required for or deemed appropriate by the State Bond Commission for such type of bonds, including those of tender agents, placement agents, indexing agents, remarketing agents, and/or standby bond purchase facilities. The cost of obtaining credit enhancement or liquidity devices and fees for other services set forth in this Section shall, if authorized by the State Bond Commission, be paid from the Bond Security and Redemption Fund as a requirement with respect to the issuance of the bonds authorized hereby. The bonds shall be general obligations of the state of Louisiana, to the payment of which, as to principal, premium, if any, and interest, as and when the same become due, the full faith and credit of the state is hereby irrevocably pledged. These bonds shall be secured by monies in the Bond Security and Redemption Fund and shall be payable on a parity with bonds and other obligations heretofore and hereafter issued which are secured by that fund. The maximum interest rate or rates on such bonds, and their maturities, shall be determined by the State Bond Commission. The state treasurer shall invest all bond proceeds until disbursed.

Section 7. The Treasurer is hereby authorized and directed to transfer to the Bond Security and Redemption Fund to be expended on general obligation bond debt service of the related bonds (including any bonds issued to refinance such bonds) any unexpended bond proceeds balance of any general obligation account created prior to 2018 having a balance of \$10,000 or less. If such bonds or refunding bonds are no longer outstanding, then such unexpended bond proceeds shall be applied to pay debt service on any outstanding general obligation bonds.

Section 8. Unless specifically repealed, this Act shall expire, and be considered null and void and of no further effect on June 30, 2023, except as to any bonds authorized herein (1) which have been sold, (2) to which lines of credit have been issued, or (3) for which contracts for construction have been signed.

Section 9. This Act shall become effective upon signature by the governor or, if not signed by the governor, upon expiration of the time for bills to become law without signature by the governor, as provided by Article III, Section 18 of the Constitution of Louisiana. If vetoed by the governor and subsequently approved by the legislature, this Act shall become effective on the day following such approval.

To enact Subpart B-2 of Part II of Chapter 6 of Title 22 of the Louisiana Revised Statutes of 1950, to be comprised of R.S. 22:1845.1, relative to payment of claims for physical therapy services provided through telehealth; to prohibit maximum amounts of coverage and other conditions for coverage relative to telehealth services that are inapplicable to in-person services; to authorize enforcement and rulemaking; to provide for definitions; to provide for exceptions; to provide for effectiveness; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1. Subpart B-2 of Part II of Chapter 6 of Title 22 of the Louisiana Revised Statutes of 1950, comprised of R.S. 22:1845.1, is hereby enacted to read as follows:

SUBPART B-2. COVERAGE AND PAYMENT PARITY
FOR PHYSICAL THERAPY DELIVERED VIA TELEHEALTH
§1845.1. Telehealth coverage and reimbursement; prohibitions and limitations; exceptions; rulemaking

A. A health coverage plan shall pay for covered physical therapy services provided via telehealth to an insured person. Telehealth coverage and payment shall be equivalent to the coverage and payment for the same service provided in person unless the telehealth provider and the health coverage plan contractually agree to an alternative payment rate for telehealth services.

B. Benefits for a service provided as telehealth may be subject to a deductible, copayment, or coinsurance. A deductible, copayment, or coinsurance applicable to a particular service provided through telecommunications technology shall not exceed the deductible, copayment, or coinsurance required by the health coverage plan for the same service when provided in person.

C. A health coverage plan shall not impose an annual dollar maximum on coverage for healthcare services covered under the health coverage plan that are provided as telehealth, other than an annual dollar maximum that applies to the same services when provided in person by the same provider.

D. A health coverage plan shall require a healthcare professional to be licensed or otherwise authorized to practice physical therapy in this state to be eligible to receive payment for telehealth services.

E. Payment made pursuant to this Section shall be consistent with any provider network arrangements that have been established for the health coverage plan.

F. A health coverage plan shall not do any of the following:

(1) Require a previously established in-person relationship or the provider to be physically present with a patient or client, unless the provider determines that it is necessary to perform that service in person.

(2) Require prior authorization, medical review, or administrative clearance for telehealth that would not be required if that service were provided in person.

(3) Require demonstration that it is necessary to provide services to a patient or client as telehealth.

(4) Require a provider to be employed by another provider or agency in order to provide telehealth services that would not be required if that service were provided in person.

(5) Restrict or deny coverage based solely on the communication technology or application used to provide the telehealth service; however, a health coverage plan may restrict physical therapy services via telehealth when the services are being provided solely by telephone.(6) Impose specific requirements or limitations on the technologies used to provide telehealth services; however, a health coverage plan may require the provider to demonstrate that the technology used to provide telehealth services is both safe and secure.

(7) Impose additional certification, location, or training requirements as a condition of payment for telehealth services; however, this Paragraph does not prohibit a health coverage plan from providing additional reimbursement incentives to providers with an enhanced certification, training, or accreditation.

(8) Require a provider to be part of a telehealth network.
G. Nothing in this Section shall be construed to require a health coverage plan to do either of the following:

(1) Provide coverage for telehealth services that are not medically necessary.

(2) Reimburse any fees charged by a telehealth facility for transmission of a telehealth encounter.

H. A health coverage plan is not required to provide coverage or reimbursement for any of the following procedures or services provided via telehealth:

(1) A modality that is a type of electrical, thermal, or mechanical energy.

(2) Manual therapy, massage, dry needling, or other invasive procedures.

I. The department may take any action authorized in this Title to enforce the provisions of this Section and the commissioner may, in compliance with the Administrative Procedure Act, R.S. 49:950 et seq., promulgate and adopt rules as are necessary or advisable to effectuate the provisions of this Section.

J. For purposes of this Section, the following definitions apply:

(1) “Health coverage plan” has the same meaning as provided for in R.S. 22:1841.

(2) “Telehealth” has the same meaning as provided for in R.S. 40:1223.3.

Section 2. This Act shall apply to any new health coverage plan issued on and after January 1, 2023. Any health coverage plan in effect prior to January 1, 2023, shall convert to conform to the provisions of this Act on or before the renewal date, but no later than January 1, 2024.
