

ACTS OF 2024 LEGISLATURE

Acts 005-034

ACT No. 5

HOUSE BILL NO. 2 BY REPRESENTATIVE EMERSON AN ACT

To provide with respect to the capital outlay budget and the capital outlay program for state government, state institutions, and other public entities; to provide for the designation of projects and improvements; to provide for the financing thereof making appropriations from certain sources; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1.(A) The following sums or so much thereof as may be necessary are hereby appropriated out of any monies in the state treasury from the sources specified, from federal funds and self-generated revenues belonging to the state of Louisiana and/or collected by boards, commissions, departments, and agencies thereof, all for making capital outlay and for the purposes and in the amounts specified herein for the Fiscal Year commencing July 1, 2024, and ending June 30, 2025, subject to the conditions thereafter provided:

A project with funding payable from General Obligation Bonds Priority 1 indicates that the funding for the project includes the reauthorization of funding which was previously granted as a line of credit by the State Bond Commission in Fiscal Year 2023-2024. As used in this Section, the term “general obligation bonds” means state general obligation bonds or other evidences of indebtedness payable from the Bond Security and Redemption Fund. The amount set forth in this Section opposite each project, or so much thereof as may be necessary, is hereby appropriated and payable from the source of funding indicated; provided, however, amounts appropriated and payable from federal funds may be encumbered or expended only to the extent such amounts shall have been committed or received. Pursuant to the provisions of R.S. 39:82, funds for planning, acquisition, construction, and major repair projects appropriated by this Act may be retained until completion of the project, even if no bona fide liability exists on the last day of the fiscal year.

This Act shall constitute the comprehensive state capital outlay budget for the 2024-2025 Fiscal Year. Projects set forth which are payable from the proceeds available from the sale of general obligation bonds shall have the priorities as indicated. The Request for Line of Credit form used by the attorney general and Bond Counsel in evaluating Louisiana Constitutional, Internal Revenue Code, and applicable income tax regulations shall be filed with the commissioner of administration, State Bond Commission, and state attorney general. No general obligation bond cash lines of credit shall be granted to fund any lower priority project prior to the granting of general obligation bond cash lines of credit to fund all higher priority projects (the “general rule”), except as hereinafter provided. This prohibition against funding a lower priority project shall not apply upon a showing of an impossibility or impracticality either to proceed with all unfunded higher priority projects or to proceed with the funding of such projects or any part thereof through the issuance of general obligation bonds for any reason. Such showing shall be stated in reasonable detail in a certificate or certificates signed by the state agency responsible for administering the funding, and filed with the commissioner of administration and the State Bond Commission (hereinafter referred to as “the Commission”). Upon a determination by the Commission that proceeding with such a project or the funding thereof through the issuance of general obligation bonds is impractical or impossible, the Commission may then proceed with the sale of general obligation bonds or the granting of cash lines of credit without regard to the priority of the unfunded projects determined to be impossible or impractical.

Upon recommendation by the state agency responsible for administering the funding, if it is determined at any time that proceeding with the project or with the funding thereof is no longer impossible or impractical, the State Bond Commission may rescind the certificate of impossibility or impracticality and may proceed with the project or with the issuance of general obligation bonds or the granting of cash lines of credit to fund the project. Alternatively, the Interim Emergency Board (hereinafter referred to as “the Board”), upon reviewing certificates as described above and determining that proceeding with such projects or the funding thereof through the issuance of general obligation bonds is impossible or impractical, may designate a lower priority for such projects. The Board’s determination and lower priority designation shall be submitted to the members of the legislature for their approval in accordance with the provisions of Chapter 3-B of Subtitle I of Title 39 of the Louisiana Revised Statutes of 1950. In accordance with the provisions of Chapter 3-B of Subtitle I of Title 39 of the Louisiana Revised Statutes of 1950, whenever at the written request of the appropriate legislators and agency,

the Board determines that an adjustment to a project description originally set forth in such capital budget adopted by the legislature for a current fiscal year is necessary to correct a mistake in a project description, clarify a description, change the scope of a description, or make any other adjustment the Board deems necessary to implement the purpose of the project, such adjustment shall become effective only upon the approval by majority vote of the elected members of each house of the legislature in the manner provided for in Chapter 3-B of Subtitle I of Title 39 of the Louisiana Revised Statutes of 1950.

If such approval is granted, notification by the chair or secretary of the Board of the results of the balloting shall be transmitted to the State Bond Commission, which may then proceed with the sale of general obligation bonds or the granting of cash lines of credit for each change approved upon request of the commissioner of administration in accordance with the general rule.

With respect to Priorities 1 through 5, a lower priority project may be moved to a higher priority only upon a showing of an emergency or other cause not reasonably anticipated by the legislature, which shall be stated in reasonable detail in a certificate signed by the head of the appropriate department, political subdivision, or agency and filed with the commissioner of administration and the Board. Upon a determination by the Board that such project should be moved to a higher priority because of an emergency or other cause not reasonably anticipated by the legislature, the Board shall designate a higher priority to the project. The matter then shall be submitted to and be subject to the same approval by the members of the legislature in the manner previously indicated in this Section. If such approval is granted, notification by the chair or secretary of the Board of the change of priority shall be transmitted to the State Bond Commission, which then upon request of the commissioner of administration, may proceed with the sale of general obligation bonds or the granting of cash lines of credit in accordance with the general rule. As to projects within a priority, the State Bond Commission acting on requests submitted by the commissioner of administration shall determine when such project, or phases thereof, shall be funded. In making such determination, the State Bond Commission shall consider the amount of proceeds of general obligation bonds to be made available in light of money and capital market conditions; the expenditure requirements of the project; the time required for architectural plans and drawings, public bidding, and site acquisition and preparation; availability of receipt of federal monies; litigation affecting the undertaking or completion of a project; federal tax laws and regulations regarding the sale of municipal bonds; and other items of a similar nature bearing upon the possibility or the necessity to commence a project or any particular phase thereof.

Any other provision of this Act to the contrary notwithstanding, projects described in Priority 5 of this Act shall not be moved to a higher priority except upon one of the following conditions: (1) Funding is necessary to complete or additionally fund a project located elsewhere in the Capital Outlay Act. Determination of such condition shall be made by the head of the appropriate department or agency by means of a certificate to that effect filed with the Interim Emergency Board, who shall, by mail ballot, request approval of such change and if approved by a majority of each house of the legislature it shall be funded, or (2) unless required by an emergency or other cause not reasonably anticipated by the legislature, to be in accordance with procedures set forth in this Section. However, the State Bond Commission may authorize a non-cash line of credit for any project in Priority 5 which represents that portion of construction contracts which were let during a previous fiscal year, or construction contracts which will be let during the current fiscal year, but which will not require cash expenditures during the year. Such non-cash lines of credit, when combined with previously sold bonds or with higher priority bonds or lines of credit, or with funds appropriated from other sources, will provide sufficient appropriated funds to award equipment or construction contracts. Contracts shall not be awarded without approval of the division of administration.

Upon approval by the State Bond Commission, and subject to compliance with its policies and procedures and the procedures set forth herein, a line of credit providing for the use of funds in anticipation of the sale of general obligation bonds may be granted to the appropriate administering agency or department from the Comprehensive Capital Outlay Escrow Account, or if there is not a sufficient amount available in such account, from other available state cash in the state treasury, for capital improvement projects for which bond proceeds are appropriated by a current capital budget, prior to the actual issuance of bonds for such projects, unless the attorney general advises that an impediment exists to the valid issuance of the bonds on the date such line of credit is granted.

All bonds that are to be repaid, in whole or in part, by revenues generated by the project shall be designated as “Reimbursement Bonds.” The State Bond Commission shall enter into such agreements as are necessary to provide that the agency or subdivision, whose project is reimbursable, shall pay the bond debt costs into the Bond Security and Redemption Fund. Such costs may be paid annually or at the end of the term of the bonds issued as determined by the State Bond Commission.

Priority 1 general obligation bond funding shall be limited to:

(1) Projects and amounts which were previously authorized by Act 465 of the 2023 Regular Session of the Legislature; and which were granted cash lines of credit by the State Bond Commission. The bonds to fund these projects were not sold in Fiscal Year 2023-2024.

(2) The reauthorization of the portion of the outstanding Fiscal Year 2023-

2024 Priority 5 Non-Cash Lines of Credit for projects which will require cash expenditures in Fiscal Year 2024-2025 and therefore must be converted to Cash Lines of Credit in Fiscal Year 2024-2025.

(3) Commitments made in the Higher Education Desegregation Settlement Agreement.

Priority 2 general obligation bond projects are for the completion of plans and specifications, land acquisition, site preparation, or for construction which will begin during the fiscal year. It is presently anticipated that the listed projects will require the sale of bonds or extension of lines of credit during the fiscal year after adoption of this Act.

Priority 3 general obligation bond projects are for the preparation of plans and specifications, land acquisition, site preparation, or for construction and shall be limited to funding for the portion of construction contracts which will not require cash expenditures during the fiscal year. The projects in this category shall be considered future year projects in the state's five-year capital outlay plan. It is presently anticipated that the listed projects will not require the sale of bonds or extension of lines of credit during the fiscal year.

Priority 4 general obligation bond projects are for the preparation of plans and specifications, land acquisition, site preparation, or for construction and shall be limited to funding for the portion of construction contracts which will not require cash expenditures during the fiscal year. The projects in this category shall be considered future year projects in the state's five-year capital outlay plan. It is presently anticipated that the listed projects will not require the sale of bonds or extension of lines of credit during the fiscal year.

Priority 5 general obligation bond funding shall be limited to funding for the portion of construction contracts which will not require cash expenditures during the fiscal year. These funds, when combined with previously sold bonds or with higher priority bonds on lines of credit, or with funds appropriated from other sources, will provide sufficient appropriated funds to award contracts. Non-cash lines of credit shall be required prior to the award of these contracts.

In accordance with the cash management plan adopted pursuant to R.S. 48:251(D) and the provisions of Act 161 of the 1998 First Extraordinary Session, the Department of Transportation and Development is authorized to enter into contracts or agreements for projects approved pursuant to the Highway Priority Program, Airport Construction and Development Priority Program, Port Construction and Development Priority Program, and Statewide Flood Control Program for projects bid and awarded, authorized, or commenced during the fiscal year which do not require cash expenditures for the full contract or agreement amount.

* * *

D.~~(1)~~ No An insurer providing property, casualty, or liability insurance shall not cancel or fail to renew a homeowner’s policy of insurance or to increase the policy deductible that has been in effect and renewed for more than three years unless based on nonpayment of premium, fraud of the insured, a material change in the risk being insured, two or more claims within a continuous three-year period of time within the five years preceding the current policy renewal date, or if continuation of such policy endangers the solvency of the insurer. This Subsection shall does not apply to an insurer that withdraws from the homeowners’ insurance market in this state or to the modification of policy deductibles increased for all homeowners’ policies in this state. For the purposes of this Subsection, modification of coverages at the time of renewal shall not be deemed a cancellation or failure to renew a policy.

A report of a loss or a question relating to coverage shall does not independently establish a claim. As used in this Subsection, the phrase “two or more claims within a continuous three-year period of time within the five years preceding the current policy renewal date” shall does not include any loss incurred or arising from an “Act of God” incident which is due directly to forces of nature and exclusively without human intervention.

Comments – 2024

The amendments to this Article make clear that the regulation and use of interpreters in court proceedings are set forth in the Rules of the Louisiana Supreme Court. The amendments also clarify that this Article applies to interpreters who are appointed by the court as officers of the court, as distinguished from interpreters who are retained by a party for the party’s own purposes. In accordance with the Rules of the Louisiana Supreme Court, the amendment also observes the distinction between interpretation and translation. An interpretation involves hearing information spoken in one language and orally relaying the information to another in a manner that preserves the language’s meaning. A translation consists of taking information that has been written in one language and conveying it in writing in another language while preserving the language’s meaning.

Art. 604.1. Qualifications of interpreters; interpretations

A. If a party objects to the qualifications of any court-appointed interpreter, the party or the party’s attorney shall have the right to conduct a voir dire examination of the interpreter.

B. If a qualified interpreter is not available for a court proceeding, upon the consent of all parties, the court may appoint a person who the court and parties agree will be able to accurately interpret the proceeding in a fair and impartial manner. Before giving consent, the party or the party’s attorney shall have the right to conduct a voir dire examination of the interpreter.

C. Any party may object to the interpretation or translation of an interpreter.

D. In all court proceedings in a court of record, interpreted communications with the court shall be recorded in an audio or audiovisual format. The recordings shall be retained by the court.

E. Nothing in this Article prevents any party from having its own interpreter at any proceeding for the party’s own purposes.

Comments – 2024

This Article is new and sets forth the procedure for objecting to the qualifications of a court-appointed interpreter and selecting an interpreter when a qualified interpreter is not available. This Article also provides for the recordation and retention of interpreted communications in all proceedings in a court of record and permits a party to have its own interpreter present at any proceeding for the party’s own purposes.
