Louisiana Statewide Poll

November 2016

SMOR LOUISIANA POLL, NOVEMBER 2016

ABOUT THE POLL

This statewide poll was developed and conducted by Southern Media & Opinion Research, Inc. The project was funded by private subscribers.

Interviews for this statewide poll were completed by telephone with 500 likely Louisiana voters from Monday, November 28, through Wednesday, November 30, 2016.

The overall margin of error for the statewide statistics obtained from the survey data is not greater than plus or minus 4.4 percentage points at the 95% level of confidence. In other words, there is a 95% certainty that the statistics presented from the results obtained on this survey of 500 likely voters statewide will not be more than 4.4 percentage points above or below the figure that would be obtained if all of the likely voters in the state would have been interviewed.

The sample error may be larger for subgroup responses based on attitudinal, demographic and geographic variables such as area, age, etc. There are other sources of potential error which cannot be calculated including question wording and order of question presentation.

Telephone numbers were selected at random from a sample frame of telephone numbers for likely Louisiana voter households. Both landline and cellular telephone numbers were included in the sample.

Respondents were assigned to one of four geographic areas based on their parish of residence. The four geographic areas along with the parishes comprising those areas are:

New Orleans metropolitan area, (includes Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany and Washington parishes); **Florida-River Parishes**, (includes Ascension, Assumption, East Baton Rouge, East Feliciana, Iberville, Livingston, Pointe Coupee, St. Helena, St. James, Tangipahoa, West Baton Rouge and West Feliciana parishes); **Acadiana-southwest**, (includes Acadia, Allen, Avoyelles, Beauregard, Calcasieu, Cameron, Evangeline, Iberia, Jefferson Davis, Lafayette, Lafourche, St. Landry, St. Martin, St. Mary, Terrebonne and Vermilion parishes); **North Louisiana**, (includes Bienville, Bossier, Caddo, Caldwell, Catahoula, Claiborne, Concordia, DeSoto, East Carroll, Franklin, Grant, Jackson, LaSalle, Lincoln, Madison, Morehouse, Natchitoches, Ouachita, Rapides, Red River, Richland, Sabine, Tensas, Union, Vernon, Webster, West Carroll and Winn parishes).

A statistical weighting procedure was employed to normalize the sample to the likely voter population based on voter race, age category and political party affiliation.

The percentages shown in the tables are weighted. Counts within tables are unweighted counts. The count of cases used in computation of subset statistics (using the format $n=xxx$) presented under the relevant crosstabulation tables are unweighted counts of cases used to generate the statistics in those tables.

FREQUENCY RESPONSES—WEIGHTED BY PARTY, AGE AND RACE

SAMPLE SIZE (n=500); May not total 100.0% due to rounding.
