## NPI/Franklin News National Tracker - March 2024

Methodology: The poll was conducted by Noble Predictive Insights from March 1115,2024 and surveyed registered voters nationally via opt-in online panel and text-to-web cell phone messages. The sample included 2,510 respondents comprised of 1,044 Republicans, 1,126 Democrats, and 340 True Independents (Independents who, when asked if they leaned towards one of the major parties, chose neither). Of the full sample of registered voters, 2,145 were qualified as "likely voters."

The poll weighted each party - Republicans, Democrats, and True Independents independently. In other words, our Republican subsample is weighted so it matches the national Republican population, and the same is true for Democrats and True Independents. Additional weighting variables include age, region, gender, education, and race/ethnicity.

The margin of error was +/- $2.0 \%$ for registered voters and $+/-2.1 \%$ for likely voters. Numbers may not add up to $100 \%$ due to rounding.

The report below shows the results for REGISTERED VOTERS. The report showing toplines and cross-tabs for likely voters is a separate PDF.

Q12_4: Here's a list of statements about government policy on electric vehicles. Please indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with each. If you are not sure, you can also indicate that. - Great scientific innovations -- like space flight -- required government investment. The government needs to spend more on electric vehicles

Q13: The Biden administration proposed new regulations requiring about 67\% of new car sales -- including sedans, crossovers, SUVs, and light trucks -- to be electric by 2032. At the same time, car dealers across the country are reporting that consumers' interest in buying electric vehicles has waned.

What should be the next step for the Biden Administration?

Q17: Recently, Texas Governor Greg Abbott deployed the Texas National Guard to the border with Mexico and erected razor wire barriers to prevent undocumented immigrants from entering the country. The federal government, backed by the Supreme Court, argued that it has authority over national matters such as immigration and that these barriers block federal agents' access to the border.
