

HIGH POINT UNIVERSITY POLL 106: MEMO RELEASE 10/3/2024	
Population represented:	Adults (people over the age of 18) in North Carolina. Screened to represent registered voters and likely voters for the 2024 elections.
Sample size:	1001 adults in North Carolina (814 individuals who said they are registered to vote and 589 individuals who were identified by the SRC as likely voters). Self-identified registered voters passed a two-item screen (shown below). Likely voters were identified using a series of items to create an index (explained at the end of this memo). This memo focuses on responses from self-identified and likely voters.
Mode of data collection:	Online interviews. All interviews conducted in English.
Type of sample:	Non-probability from Dynata's online panels.
Dates of data collection:	September 20, 2024 – September 29, 2024
Credibility interval for samples:	This memo focuses on responses from self-identified and likely voters. Self-identified Registered Voters: Approximately +/- 3.6 percentage points. This accounts for a standard margin of sampling error of 3.4 (as if it were a probability sample) and a design effect (1.1) caused by weighting. Likely Voters: Approximately +/- 4.9 percentage points. This accounts for a standard margin of sampling error of 4 (as if it were a probability sample) and a design effect (1.5) caused by weighting.
Data weighting:	The all adult data is weighted toward population parameters for age, gender, education, race, and ethnicity published by the U.S. Census. The sample was also weighted using a past presidential vote questionnaire item and the North Carolina 2020 presidential election results (North Carolina State Board of Elections https://www.ncsbe.gov/). The High Point University Survey Research Center (SRC) produces weights through an iterative procedure within SPSS.
Survey sponsor and funded by:	High Point University, High Point, NC.
Survey/Data collection supplier:	Interviews collected through the High Point University SRC, recording responses in Qualtrics . Dynata supplied online panel respondents.
Commitment to Transparency:	The HPU Poll reports methodological details in accordance with the standards set out by AAPOR's Transparency Initiative , and the HPU Survey Research Center is a Charter Member of the Initiative.

Sample supplier:	Online panels provided by Dynata .
Director:	Martin J. Kifer , 336-841-9333.
Methodology:	Interested parties can access results from the survey at http://www.highpoint.edu/src/hpupoll and should contact the Director for additional information.
Social Media	Follow the HPU Poll X or LinkedIn accounts.

Below are questions the Survey Research Center fielded for this study. They represent the text as they appeared to respondents. Statements in brackets are rotated to ensure respondents do not receive a set order of response options, which maintains question construction integrity by avoiding respondent agreement based on question composition. Example: [agree or disagree] or [disagree or agree]. Items that are rotated for the same reason are noted. Percentages may not add to 100 because of rounding. Percentages less than one percent are denoted with a *

Likely Voter Index

The SRC created estimates for “likely voters” using an index comprising responses from seven questions. Self-identified registered voters received 1 point each for these responses to the seven items.

Above in the survey: Did you vote in the 2022 general elections in November that included votes for U.S. Senate, U.S. House, and other offices? *(Yes, I voted)*

How much thought have you given to the upcoming election for president -- quite a lot, some, or only a little? *(Quite a lot, Some)*

Do you happen to know where people who live in your neighborhood go to vote? *(Yes)*

How often would you say you vote -- always, nearly always, part of the time, or seldom? *(Always or Nearly always)*

Do you, yourself, plan to vote in the election this November, or not? *(Yes)*

I'd like you to rate your chances of voting in November's election for president on a scale of 1 to 10. If 1 represents someone who definitely will not vote and 10 represents someone who definitely will vote, where on this scale of 1 to 10 would you place yourself? *(Respondent chose 9 or 10)*

In the election for president in November 2020, did things come up that kept you from voting, or did you happen to vote? *(Yes, able to vote)*

Self-identified registered voters who scored a total of 6 or 7 on this index were considered to be self-identified likely voters.
