Are you worried a loved one needs more care?

When you come home for the holidays, you expect a time of family fellowship.

But the experience can change from joy to worry when you realize a loved one is declining at home.

If they are:

- Forgetful or not eating right
- Falling, weak or unstable
- Struggling with daily tasks or taking medications
- Unable to manage home maintenance and household chores
- Lonely or missing social opportunities
- Having difficulty getting to appointments and church
- Relying on family friends or neighbors

Give your family peace of mind this holiday season by calling 814-332-9009 and asking about Cribbs Residential Center, where we provide all the comforts of home and the service you need. We even offer winter and trial stays!
