

Brawley Pretreatment Program 2025 SNC Publication

The City of Brawley’s Pretreatment Program, a federally mandated industrial wastewater regulatory initiative, must annually notify the public of industrial users in significant noncompliance (SNC) with program requirements, as mandated by Title 40 of the Code of Federal Regulations (CFR) Part 403.8(f)(2)(viii) and Brawley Municipal Code (BMC) Section 22.68.

Chronic SNC effluent violations, defined at 40 CFR 403.8(f)(2)(viii)(A) and BMC 22.68(1), occur when 66 percent or more of measurements for a pollutant parameter during a 6-month period exceed the numeric pretreatment standard. Technical review criteria (TRC) SNC violations, defined at 40 CFR 403.8(f)(2)(viii)(B) and BMC 22.68(2), occur when 33 percent or more of measurements for a pollutant parameter during a 6-month period equal or exceed the numeric pretreatment standard multiplied by the applicable TRC factor.

All industries in SNC are subject to City enforcement actions to address violations. For additional information, contact Aldo Ayon, Public Works Department, (760) 344-5800 Ext. 9.

In 2025, the following Brawley industrial users were in SNC:

GloriAnn Farms (33 Malan Avenue): Exceeded wastewater discharge permit daily maximum (DM) and monthly average (MA) effluent limits for biochemical oxygen demand (BOD), copper, mercury, zinc, and total suspended solids (TSS) for the following periods:

4Q24-1Q25	1Q25-2Q25	4Q25-1Q26
Chronic TSS (MA)	Chronic TSS (MA) TRC BOD (MA) TRC mercury (DM) TRC zinc (DM)	Chronic and TRC copper (DM)

Imperial Valley Healthcare District, formerly Pioneers Memorial Healthcare District (207 West Legion Road): Exceeded wastewater discharge permit and City daily maximum (DM) effluent limits at BMC 22.18 for copper at both sampling locations 001 and 002 for the following periods:

4Q24-1Q25	2Q25-3Q25	3Q25-4Q25	4Q25-1Q26
001 – TRC Copper (DM)	001 – TRC Copper (DM) 002 – TRC Copper (DM)	001 – TRC Copper (DM)	001 – TRC Copper (DM) 002 – TRC Copper (DM)
