Dear

I understand from my staff that there was a disagreement regarding our organizational policies about mask use in our clinic. I do apologize that I have no influence over any of those decisions. Still, as a member of the medical staff of the Blanchard Valley Health System, I am beholden to those very rules.

So, I spoke at length with he said that he would look for any sites that may be able to deliver radiotherapy in a fashion more amenable to your wishes. I told him that I had spoken with a couple of other centers today after your trip to our center, and I forwarded him the information regarding what I have learned about those centers. He said that he is appreciative for that information and that feels as if he can help you work through these issues to a good conclusion.

As I told . , I am only concerned about your welfare and making certain that you have the option to receive treatment if you wish and in the manner which is most comfortable for you. Again, I apologize for factors out of my control, though I certainly will remain available if there are any emergency issues or if there are lingering questions or concerns. I believe that and his staff will prove to be an excellent resource in this matter, and I am happy to have them working toward a good outcome on your behalf. I certainly hope that this letter finds you doing well.

Sincerely,

Radiation Oncologist
