2019 Hurricane Guide for Students[®] THINK**OUT**SIDE

Eckerd College has been a National Weather Service "Storm Ready" institution since 2007.

Dear Students,

Eckerd College and the faculty have prepared the college for hurricanes. I am writing to explain the steps you will take in the event we need to evacuate the campus for an approaching hurricane. The steps below describe what you will do to continue your education while you are away from campus.

- 1. All students should take all of their notes, course syllabi, assignments, books and additional course materials. Faculty expect you to continue studying for your courses during an evacuation.
- 2. When a decision to close campus is announced, students, faculty, and staff will be prompted to fill out an online form. The online form will ask for their evacuation location and alternate contact information. Student information will be shared with faculty and staff.
- While away from campus, all students should continually monitor the Tropical Weather Update website at http://www.eckerd.edu/tropical for information about the College and instructions for returning after the storm. DO NOT RETURN UNTIL THE COLLEGE HAS ISSUED THE "ALL CLEAR" AND RE-OPENING INSTRUCTIONS.
- 4. If the College does not resume operations and classes by the end of one week after evacuation, then at that time all students should contact their professors so their course work may proceed in a timely manner.

Your professors are prepared to continue offering an education to you even if the campus is closed, and we expect you to continue your studies during an evacuation.

Thank you for all your efforts to be prepared and for continuing your studies even if you and the faculty will be doing so away from campus.

Suzan Harrison Dean of Faculty

cc: Faculty Staff

In the Event of a Hurricane

Eckerd College activates its plan when a hurricane is projected to approach our area. The plan is designed to promote the safety of the Eckerd College community, protect the College's facilities, and provide for continuity of the College's operations. When we are facing a storm, you have important decisions to make, and the College needs your assistance, too, to protect it from potential storm damage. This guide has been prepared to provide you information so you will know how to plan and respond.

Evacuation Information: Before, During and After the Hurricane

When Eckerd College is preparing for an evacuation, closure and re-opening, communications will be sent to all members of the Eckerd College community by email. Updates will be posted at http://www.eckerd.edu/ tropical and social media. Information is also provided to local media. Please stay connected to the College!

Prior to each evacuation, students in the residence halls will meet with their RAs to review procedures.

Planning

We encourage students to plan two evacuation locations: (1) in county or within an easy driving range of Pinellas County and (2) home or other location further away. Students may wish to develop budgets to share driving and hotel expenses. Students and their parents may wish to purchase a refundable plane ticket that can be used during hurricane season and if not used could be used to travel home for the holidays.

- Make general evacuation plans now. Talk with your loved ones to make specific plans about where you will go.
- Make sure your loved ones know how to contact you and stay in touch with them throughout the storm.
- Before you leave campus and if you change locations after leaving the College, be sure to update your evacuation information on the online form provided.

Communication

Eckerd College will communicate evacuation and "All Clear" notices through the following channels of communication:

- Emergency notification system (text message and email)
- College website www.eckerd.edu/tropical
- Eckerd Social Media channels -Facebook: www.facebook.com/eckerdcollege Twitter: @eckerdcs
- Briefings and Meetings (e.g. dorm meetings)
- Local media

DO NOT RETURN TO CAMPUS UNTIL THE COLLEGE HAS ISSUED THE "ALL CLEAR" AND RE-OPENING INSTRUCTIONS.

Emergency Notification System

Eckerd College will use its emergency notification system (ENS) to send messages by text and email when there is an imminent threat to campus or when all other communication methods are down. All students, faculty and staff who have registered emergency contact information in ECWeb will receive notices year round. Parents who have provided an email and cell phone number to the College will also be included in the system.

Keeping in Touch with Faculty

Should we have to evacuate the campus, your professors will give you assignments before you leave to make sure you can keep up with your studies. Your professors will keep in touch with you by email while the campus is closed, so be sure to check your campus email address for class updates. If you think you will not have access to email, ask your professors for an alternate contact method.

Make sure to keep your evacuation information up to date by filling out the evacuation form when prompted. Professors will use the information you provide to contact you during an evacuation.

Storm Surge

The National Hurricane Center (NHC) states that storm surge from a hurricane is the greatest threat to life and property. Storm surge is the abnormal rise in water generated by a storm. The factors affecting the rise include storm intensity, forward speed, size, angle of approach to the coast, central pressure, and the shape and characteristics of coastal features (e.g. bays and estuaries). The NHC attempts to estimate storm surge heights with the Sea, Lake, and Overland Surges from Hurricanes (SLOSH) model. The SLOSH model will be used to provide surge inundation, storm surge height above ground level. Storm surge should be considered when making evacuation plans. More information on storm surge and SLOSH model can be found at http://www.nhc.noaa.gov/surge NHC will release the initial map with the first issuance of a hurricane watch or warning or, in some special cases, a tropical storm watch or warning, for any portion of the Gulf or East Coast of the United States (anytime within 48 hours of the anticipated onset of tropical storm force winds). The map is subject to change every six hours with NHC updates.

College Operations in Relation to the National Hurricane Center's (NHC) "Cone of Uncertainty"

The National Hurricane Center (NHC) uses models to project the path of the center of tropical storms and the eye of hurricanes. Based on their models, NHC forecasters display what is known familiarly as the "cone of uncertainty." The NHC asks residents of areas covered by the cone of uncertainty to be on alert and to make preparations for an approaching storm.

The cone of uncertainty shows the projected area through which the EYE OF THE STORM may track. The line at the center of the cone represents the projected track of the eye of the storm but, in fact, the eye of the storm may track anywhere inside that cone, even along the cone's perimeter. The NHC cautions against thinking of probabilities of different tracks within the cone; rather, viewing the cone as a cone of "uncertainty" (and not "probability"), the NHC recommends preparedness by residents living in areas represented anywhere inside the projected cone.

Once the NHC projects the track line for a storm's eye, they construct a 5-day and 3-day cone based on the average NHC prediction errors calculated at 12-hrs, 24-hrs, 36-hrs, 48-hrs, 72-hrs, 96-hrs and 120-hrs for the preceding 5 years. The entire track of the tropical cyclone can be expected to remain within the cone 60-70% of the time.

Please note that NHC forecasters have improved the accuracy of their predictions regarding the path of tropical storms and hurricanes; however, they are less certain about their predictions regarding the intensity and speed of hurricanes.

Evacuation Countdown

One may view the NHC's Five-day (120-hour) cone of uncertainty as a five-day countdown. Day 5 refers to the farthest reach of the cone. At Five days out, the NHC generally projects the point of landfall within a radius of approximately 227 miles of accuracy.

The Five-Day Cone of Uncertainty

If Eckerd College lies within the NHC's Five-Day (120-hour) Cone of Uncertainty, on Days 5 and 4 the College generally will take these actions:

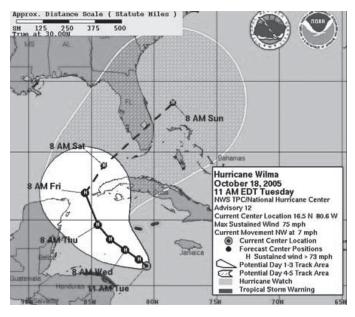

Day 5 (120 hrs): The Eckerd College Emergency Management Executive Team (EMET) will be activated, and they will issue a weather alert to the College community and recommend that departments follow their unit plans and checklists.

Generally, administrative and academic units will update contact information and review evacuation procedures and supplies. Facilities Management may begin protective measures on campus because it takes several days to secure the campus prior to a storm's arrival. The EMET will continue to monitor all NHC and local National Weather Service forecasts.

This is also a good time for all individuals to review their personal hurricane plans and to review the contents of their hurricane kits. Students should have conversations with their families to review their hurricane plans and to discuss where the students might go in the event the storm continues to approach our area and students are ordered to evacuate their residences. Students planning to remain in homes, apartments, hotels, and shelters outside evacuation areas should review and stock supplies in their hurricane kits.

Day 4 (96 hrs): Generally before the close of the business day and depending on the NHC and local National Weather Service forecasts and local conditions, the EMET may transmit its evacuation recommendation to the President; the EMET may also decide to wait for additional forecasts before making an evacuation recommendation. The President and his executive team may then make decisions and announcements about College operations and evacuation. The College will base its decision whether to evacuate on NHC and National Weather Service reports about the storm's characteristics (size, intensity, speed, and projected place of landfall), the storm's projected impact on our area, the impact of evacuating regions on Pinellas County, flight availability, and availability of fuel.

Evacuation Countdown CONTINUED

The Three-Day Cone of Uncertainty

Generally, the NHC's accuracy forecasting the point of projected landfall of the eye of a hurricane increases in the NHC's Three-Day (72-hour) cone of uncertainty.

If Eckerd College lies within the NHC's Three-Day (72-hour) Cone of Uncertainty for a hurricane, the College is likely to take these actions:

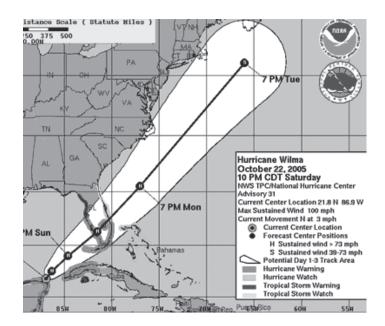

Day 3 (72 hrs): The College will be closing.

Students, faculty and staff are asked to remain on campus to complete classes and activities until the College is closed. Students should plan their departure from campus after their last class of the day or at the time the College closes.

Day 2 (48 hrs): The College is closed the day before projected landfall.

Eckerd College may continue to prepare and to evacuate even if the College slips outside the edge of the five-day or three-day cone. Remember: The cone reflects the projected path of the eye of the storm. Being outside the edge of the cone may mean the College will continue to fall within the range of hurricane force winds and possible flooding.

On Day 2, faculty, staff and students remaining in Pinellas County are urged to complete their preparations for hurricane and tropical storm conditions in the County. Faculty, staff and students also must heed evacuation orders that may be issued by Pinellas County Emergency Management.

Day 1 (24 hrs): Landfall.

Hurricanes have demonstrated intensification in hours prior to landfall and their speeds have slowed and quickened dramatically during those periods when they approach landfall. It is recommended that one should "prepare for the worst and hope for the best."

Returning to Campus

In a best case scenario, after the storm and after any Pinellas County curfews are lifted, the following likely will take place:

The same day as landfall or 1 day after:

The College's Damage Assessment Team will inspect all campus facilities, inside and out.

1 day and 2 days after: Facilities workers and contractors remove debris and make repairs. If possible, residence halls open late afternoon or early evening 1 to 2 days after the storm.

2 to 3 days after: The College resumes classes and normal operations.

The "All Clear" Announcement

Eckerd College will communicate an "All Clear" announcement through the following channels of communication:

- Emergency notification system (text message and email)
- College website
- Eckerd Social Media channels Facebook: www.facebook.com/eckerdcollege Twitter: @eckerdcs
- Local media
- If you cannot return once the campus is officially re-opened, let Student Affairs know your plans by emailing travelplans@eckerd.edu and email your faculty. Students will be responsible for their course work for missed classes.

DO NOT RETURN TO CAMPUS UNTIL THE COLLEGE HAS ISSUED THE "ALL CLEAR" AND RE-OPENING INSTRUCTIONS.

For More Information

Please visit the Tropical Weather Update website at www.eckerd.edu/tropical for links to more information including the College's complete hurricane plan. A link is provided to NOAA's National Hurricane Center, where you can track tropical storms and hurricanes. Additional helpful information is provided through the links to Pinellas County Emergency Management and *Tampa Bay Times*.

Help? Questions?

Residence Life staff are happy to provide information and assistance. Call 727.864.8421 or email **tropicalassistance@eckerd.edu**.

For general questions about Eckerd College's hurricane policies and procedures, please contact Adam Colby, Assistant Vice President of Operations at 727.864.7732 or colbyac@eckerd.edu.

Residence Hall Room Preparation

- Before you leave your room, completely empty and unplug your refrigerators, and wrap towels around the base to absorb water after they defrost.
- Take your most important belongings, valuable possessions and personal documents with you.
- Take your course materials.
- Eckerd is not responsible for any personal effects, including vehicles, that are left behind following an evacuation.
 - Eckerd strongly encourages you to know what is in your family's homeowner's policy. Some do not cover residence hall rooms nor flood damage.
 - 2. Consider getting student property protection from www.nssi.com.
- Remember to move and cover electronic items and keep items that may be damaged by water off the floor.
- Unplug all power cords before leaving. Close and lock your windows tightly (do not tape them).
 Remove your trash. Lock your door.
- Prepare a safe location for your animals. This may be with you, with a friend or in a kennel in a nonevacuation zone, or in a pet-friendly shelter. Do not leave your animals behind. More information about caring for your animals during tropical weather conditions, including a list of pet-friendly hotels, can be found at Eckerd College's Pet Life website at http://www.eckerd.edu/housing/ pet-life/resources.

Vehicles

- As a storm approaches, fill your gas tank and prepare your vehicle for travel. Gas supplies may be hard to find during an evacuation. Prices for gasoline may also increase with demand.
- Take your vehicle with you, if possible. If this is not possible, move your vehicle to the North Parking Lot near McArthur Gymnasium. Make sure that your hang tag or decal is properly displayed so you can be identified as the owner. The risk of flood water reaching a car in this lot is reduced but not eliminated. **Please review your auto insurance.**
- Remove all vehicles parked under Omega.
 Flood waters will cause them to slide and collide.

Hurricane Evacuation Shelters (shown on back)

- Residence Life staff will assist any student who needs help arranging shelter. If you need help, talk with your RA, call the Office of the Dean of Students at 727-864-8421 or email tropicalassistance@eckerd.edu.
- Pinellas County recommends you consider first staying with friends and family in non-evacuation zones or in hotels; they recommend public shelters as a last option because they are less comfortable and it is more difficult for you to secure your belongings.
- A list of public shelters is provided at the back of this guide. Our preferred shelter location is Largo High School in Seminole, which is near the homes of Eckerd College staff members who can check on our sheltered students.
- In planning an evacuation, both preparation and flexibility are key; uncertain storm paths can sometimes lead to changes in College evacuation decisions. Students are asked to plan to remain on campus to attend all of their scheduled classes until the announced closure time.

Please note: Pets are permitted in few Pinellas County Shelters. Pre-registration is required and priority is given to residents in mobile homes and manufactured housing. Therefore, please do not plan to evacuate to a Pinellas County Shelter with your pet unless you have preregistered for a space.

What to Take During an Evacuation, Including to a Shelter

- Medications
- Pillow, blanket, air mattress and/or cot
- Special dietary needs
- Difficult-to-replace documents, such as your passport
- Cash
- Identification
- Clothing for five to seven days, socks, sturdy shoes
- Personal hygiene items
- Bottled water, snacks and nutritious food
- Quiet games, reading material, MP3 player and headphones, batteries
- Lightweight folding chair
- Flashlight and extra batteries
- Keys to your car and residence/residence hall room
- A container or suitcase with locks securing your belongings may be helpful

DO NOT BRING alcohol, firearms, or tobacco to any shelter. Pets are only welcome at pet-friendly shelters and may be turned away from non-pet shelters.

Storage Information

In the event an evacuation of the campus coincides with move-in for Autumn Term or Fall Term, early arrivals in the area may need to store their belongings while the campus remains closed. The following is a list of options near Eckerd College.

Spare Room Mini Storage, Inc. (Evac Level B)

4311 34th Street South, St. Petersburg Phone: 727.866.9357

Hideaway Storage (Evac Level E)

3950 34th Street South, St. Petersburg Phone: 727.565.0363

Public Storage (Non Evac Level)

4500 34th Street North, St. Petersburg Phone: 727.502.6365

StorMax (Evac Level C)

4250 34th Street South, St. Petersburg Phone: 727.866.7373

Your name:

You may be asked to give a copy of this completed form to Student Affairs prior to an evacuation for a hurricane.

Emergency Contact Information and Evacuation Worksheet

Eckerd College requires students, faculty and staff to provide emergency contact information so the College knows whom to contact in an emergency and how to contact students, faculty and staff while the College is under an evacuation order or experiencing emergency conditions itself.

Emergency Contact Information

Please confirm your emergency contact information is up to date by doing the following:

- 1. Visit https://myecweb.eckerd.edu. Login with your Eckerd College username and password.
- 2. Click on Personal Information.
- 3. Click on Update Emergency Contacts. You may provide more than one emergency contact.

Emergency Contact Name:	Relation to You:	
Phone:Daytime/Work	k Phone: Cell Phone:	
Email:	Street Address:	
City:	State:Zip:	

Evacuation Preparation

Prior to an evacuation and while we are evacuated, you will be asked to provide your evacuation location. This is important so the College may contact you with important information about the continuity of College operations when everyone is off campus.

The following worksheet is designed to assist students in the development of an evacuation plan should the campus need to be evacuated due to an approaching hurricane. Students are encouraged to complete this worksheet and discuss their plans with family members prior to the time a hurricane is projected to approach our area.

Evacuation Worksheet

Students who are living in residence halls or rental facilities should plan two evacuation locations. The first location could be in county or within an easy driving range of Pinellas County. The second location should be out of the Tampa Bay area, perhaps as far away as the student's permanent home. In the event of a forecast Category 3 hurricane or above, especially if the forecast predicts storm surge, it will be suggested that students, faculty and staff evacuate out of Pinellas County. Please note that in most cases, Eckerd College evacuates before public shelters are open and before roads and bridges become heavily congested. If you do not know where to go in an evacuation, please contact Student Affairs at 727-864-8421 or by email to **tropicalassistance@eckerd.edu**.

A good rule of thumb when choosing an evacuation location is "run from water, hide from wind." This means to avoid flood and storm surge prone areas and seek lodging in newer buildings (newer buildings are required to meet hurricane resistant standards).

In-County Evacuation

In the event you decide to stay in P relative, or community member; ho its campus before public shelters op	ellas County, where do you plan to evacuate? (Examples: to the home of a friend, l; or safe weather house before shelters open. In most cases, Eckerd College evacua n.)

	Pet Information				
	l, pets and domestic animals are also a concern. They cannot be left on campus. ccept pets. Therefore, please provide information to identify and locate your				

pet (type/breed, brief description, location where your pet will be housed during an evacuation, etc.) The students' Pet Council will provide assistance during an evacuation; for more information, please visit http://www.eckerd.edu/housing/pet-life/resources.

Cars, Water Vehicles, Trailers

Under an evacuation order, the College recommends all vehicles be removed from campus. Cars left on campus may be flooded or damaged in a storm. If you need to leave your car on campus be sure you park it in the North Lot by McArthur Gymnasium (highest elevation). What make/model/license number does it have?

Information About Hotels in Non-Evacuation Areas

Pinellas County officials suggest that individuals who are ordered to evacuate from their homes find shelter in the homes of family and friends in nonevacuating areas, hotels, and public shelters (the least comfortable option). Here is a listing of some hotels in non-evacuation zones.

In Pinellas County:

Holiday Inn Express

2171 54th Avenue North, St. Petersburg Phone: 727-520-7800

Comfort Inn North

2260 54th Avenue North, St. Petersburg Phone: 727-362-0075

In Hillsborough County:

Comfort Inn Plant City

2003 Frontage Road, Plant City Phone: 813-707-6000 (pets are allowed; please call ahead)

Fairfield Inn

4307 Sterling Commerce Drive, Plant City Phone: 813-757-6202

For in-county hotels, confirm that they are in a non-evacuation zone using this website: http://egis.pinellascounty.org/apps/knowyourzone.

If you choose to go to a hotel, confirm the hotel's evacuation policy. In some cases, the hotel may close when storm surge, tropical storm, or hurricane watch or warning is issued.

Kennel in Non-Evacuation Area

Downtown Doggie Center

1825 5th Avenue North, St. Petersburg, Florida 33713 Phone: 727.851.8400

Love My Dog Resort and Playground - Downtown

928 18th Street North, St. Petersburg, Florida 33713 Phone: 727.826.0102

Please note: These listings are provided as a convenience and not as an endorsement by Eckerd College.

Frequently Asked Questions

Here are several frequently asked questions about Eckerd College's location and the evacuation process in Pinellas County. Please visit the Tropical Update website for more information.

Eckerd College is in Zone A. What does that mean?

Pinellas County Emergency Management uses a storm surge data model to determine flooding and evacuation levels. The model projects possible flooding from a storm surge pushed ashore by a hurricane. Pinellas County has created a map of flood zones, ranging from A (coastal areas) to E (elevated areas not prone to storm surge flooding). Situated on Boca Ciega Bay, Eckerd College is in Zone A; that means we are in a coastal area exposed to flooding from storm surge pushed ashore by a hurricane.

Eckerd College likely will order an evacuation before Pinellas County officials order an evacuation. Why does Eckerd College evacuate and close the College in the 72-hour cone at two days before the projected arrival of a hurricane?

Time is important. Eckerd College wants to give students, faculty and staff time to leave the area before Pinellas County becomes congested with traffic, fuel supplies run short, and the outer bands of the storm begin to arrive.

Pinellas County has four roads leading off the peninsula (three of those are on bridges). Pinellas County Emergency Management generally orders evacuations 12 to 24 hours before a storm (the State projects that it would take 60.5 hours to evacuate the Tampa Bay region if a full Level E evacuation is ordered*). When Pinellas County orders an evacuation, the interstates running through St. Petersburg and Tampa may already contain residents evacuating from regions surrounding Pinellas County.

For students, faculty and staff who choose to shelter at home in Pinellas County, Eckerd College is closed the day before the arrival of the storm to give them time to make final preparations.

* Tampa Bay Regional Planning Council. (2010). Evacuation Transportation Analysis (Chapter VI). In Statewide Regional Evacuation Study Program: Vol. 1–8, Tampa Bay Region Technical Data Report. Pinellas Park, FL: Author.

Pinellas County 2019 Hurricane Evacuation Shelters www.pinellascounty.org/emergency/shelters.htm – See website for official openings.

For each hurricane event, listen to the radio and television for a listing of shelters that will be open. Shelter options vary year to year, and openings may vary from storm to storm. When planning your evacuation, please remember that mobile homes always evacuate in the event of a hurricane. Shelters provide space on a first-come first-served basis. Plan to arrive early.
