

Carlyn Haas

ECOS Vice President of Academic Affairs

3/12/17

I am running for Vice President of Academic Affairs because I have loved holding this position for the past year. It is a role that has allowed me to represent both the student body and the faculty, as well as improve relations between the two. This, of course, will continue to be my central goal if I am elected ECOS VPAA for a second term. I plan to do so by continuing to make Pitchers with Professors a monthly event with large attendance. I hope to increase outreach to professors and the activities planned for each Pitchers. This will come with each Pitchers having a designated theme and corresponding games and prizes. I also hope to hold an event similar to Pitchers with Professors for the freshmen during Autumn Term. It is my hope to have this as a stamped event similar to Meet Campus Activities. Additionally, if elected, I would like to see more outreach to the student body when booking a speaker, so that everyone has the opportunity to hear someone speak that they are passionate about. I see this best manifesting itself through a campus-wide survey. If given this opportunity in ECOS, I would work relentlessly to improve upon the foundation that the current VPAA position has already set.

I consider one of my greatest strengths to be my ability and desire for collaborative teamwork. Additionally, I am passionate about everything that I do. This will exhibit itself if I am elected VPAA. I will work tirelessly to improve ECOS, student-faculty relations, and Eckerd as a whole if I am chosen as your 2018/2019 Vice President of Academic Affairs.
