## What's growing on with school gardens?

More and more schools are planting gardens as part of the effort to get kids to eat healthier foods.

Many experts believe that school gardens offer a powerful path leading to childhood obesity. Growing food in a school garden not only teaches students where food comes from and how it grows, but also helps kids to establish eating habits. The fruits and vegetables grown can even become part of a school's program.

### Food for thought

But gardens can provide other too. When kids grow gardens, they learn about plants, soil, and water management, and the fields of biology, ecology and environmental studies. They will probably pay closer to the weather.

## Pint-sized Planter

Here's an easy way to start a garden of your very own. You'll need an adult helper, a sunny window and patience!

With an adult's help, cut the top off an empty milk carton.

Punch five small holes in the bottom of the carton for drainage.

Fill the carton with soil about an inch from the top. Plant three to five seeds and gently push them into the soil.

Place your planter on a plate in a window and dampen the soil with water.

## Extra! Extra! Garden Dot-to-Dot

### Garden Dot-to-Dot
