

McGill
UNIVERSITY

McGill University researchers are recruiting healthy men aged 50–60 years for a research study.

The study looks at how an over-the-counter medication (omeprazole) affects how the body digests and absorbs protein from food.

PARTICIPATION INCLUDES:

- 3 study visits at McGill University
- Eating a standardized meal
- Short-term use of omeprazole
- Blood samples

COMPENSATION: \$250 plus body composition scan results

This study has been approved by the Faculty of Medicine and Health Sciences Research Ethics Board.
