

NOTICE OF PUBLIC WORKSHOP

2025 ANNUAL REPORT

AB 2588 TOXICS “HOT SPOTS” PROGRAM

On October 31, 2025, the North Coast Unified Air Quality Management District (“District”) released the 2025 Annual Report for the AB 2588 Toxics “Hot Spots” Program, which is available on the District website at: <https://www.ncuaqmd.org/air-toxics>. The Annual Report is published to provide the public with information regarding the implementation of the District’s Air Toxics Control Program.

The Air Toxics “Hot Spots” Information and Assessment Act of 1987 (AB 2588) is a California public right-to-know law that requires local air quality management districts to collect information about the location, type, and quantity of toxic compounds emitted into the air from specified local businesses and industries. The District has completed the inventory of facilities and sources within Del Norte, Humboldt, and Trinity Counties for the calendar year 2024. The Annual Report includes a summary of the prioritization and health risk assessment process, the current reporting and evaluation status for facilities being tracked under the program, and the existing and proposed control measures to reduce the emissions of toxic air contaminants.

The District will conduct a hearing to present the Annual Report and discuss its content and significance at the next regularly scheduled District Governing Board Meeting as follows:

Event:	Hearing on 2025 Annual Report - AB 2588 Toxics “Hot Spots” Program
Location:	District Office, 707 L Street, Eureka, CA
Date & Time:	November 13, 2025, 10:00 a.m.
