

# To all dads, especially the new ones, Happy Father's Day.

As a member of Warren Clinic's team of OB/GYN physicians, Dr. Lee Ramos has been delivering babies at Saint Francis Hospital South since 2012.

"Welcoming a new baby into the family is an exciting time for everyone," he said. "Speaking as a parent, I definitely think dads play a key support role on the labor and delivery team to help moms through the process."

Saint Francis Hospital South provides a unique, comfortable setting for welcoming newborns into the world. The hospital also offers a NICU, childbirth education, breastfeeding classes, and an experienced labor and delivery staff. "You never forget those special moments in the delivery room," Dr. Ramos said. "It's an honor to be part of that experience."
