

# WHO LEADS THE STATE IN RURAL HEALTH?

OSU IS BRINGING HEALTH AND WELLNESS TO RURAL COMMUNITIES ACROSS OKLAHOMA AND BEYOND.

Through innovative and inclusive medical research and education, our impact extends to rural, tribal and underserved communities.

We equip physicians, researchers and health providers with the skills to address pressing medical challenges and provide crucial care where it's needed most. Our Centers of Excellence amplify our mission of providing care to those most in need. Through innovative telehealth services, we are partnering with clinics across the state to deliver virtual addiction treatment in many rural communities and are providing medications to those suffering from opioid use disorder.

**ORANGE IS THE ANSWER.**
