

Vaccine distribution plan

Pfizer

Approved vaccines are manufactured and prepared by companies.

Vaccine kits include syringes, needles, face masks and other ancillary supplies.

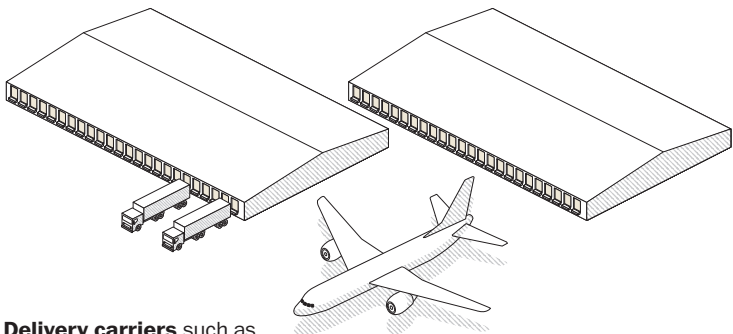

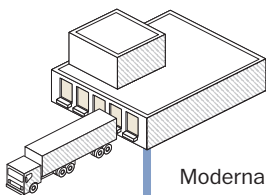

Pfizer vaccine and kits go directly to delivery carriers.

Moderna

Moderna vaccine and kits are gathered at **distribution centers** before going to delivery carriers.

Delivery carriers such as FedEx and UPS distribute vaccine to administration sites, including:

- Hospitals*
- State health departments*
- Clinics
- Pharmacies

- Doctors' offices
- Long-term care facilities
- Select federal entity sites
- Military treatment facilities

*Initial doses probably will be sent to these places in December
