<p>EHS/#: MELANIE MANNING/04011 INSP.TYPE: FOLLOWUP NEXT INSP DATE: 6/27/2025</p> <p>ACT CODES: ADVISED-#B</p>	<p>I visited the facility and met with the manager, Tiffany Crawford. The facility is conducting daily treatments with EcoLab and has captured two rodents since the last visit.</p> <p>I inspected the following areas: checkout lane 17, Murray's Cheese, sushi area, floral area, bread aisle, pasta aisle, marshmallow storage, and aisle 21. All food and surfaces appeared to be in good condition.</p> <p>A follow up visit is scheduled for June 27th.</p>

<p>EHS/#: MELANIE MANNING/04011 INSP.TYPE: COMPLAINT NEXT INSP DATE: 6/20/2025</p> <p>ACT CODES: ADVISED-#B</p>	<p>I visited the facility and made the manager, Tiffany Crawford, aware of the complaint. The facility uses Ecolab for their pest control and have had 5 catches since Monday. Ecolab has been doing daily treatments and will be returning latter today.</p> <p>I inspected the floral area; I observed rodent droppings on the counter and inside the drawers. I advised to clean and sanitize the surfaces so there are no more droppings.</p> <p>I inspected check lane 17 and observed rodent droppings on the floor and on the sticky trap inside the station. I advised to clean and sanitize the floor and inside the checkout station so there are no more droppings.</p> <p>Then, I inspected the sushi area and observed rodent droppings on the counter, floor, and inside a box of sealed vinegar. There were opening in the wall under the prep sink and at the base of the pillar near the three-compartment sink. I advise to discard the box of vinegar, to clean and sanitize the floor and surfaces so there are no more rodent droppings, and to fill in the gaps in the wall.</p> <p>The Murray's Cheese area was in good condition, and I did not observe any rodent activity.</p> <p>I inspected the bread and pasta isles. The food was in good condition and the traps were free of rodents. I did observe some droppings on the shelves and advised to clean and sanitize the surface so there are no more rodent droppings. Additionally, I inspected the area where the marshmallows are stored. There was a dead mouse in one of the traps. The area and food were in good condition.</p> <p>Aile 21 was in good condition, and I did not see any rodent activity.</p> <p>A follow up inspection will be done Friday, June 20th.</p>
