

Inspiration, expertise for kitchen and bath remodels

Mike and Dave DuPree with their team of kitchen and bath experts.

"We're a one-stop shop for inspiration, design and installation," said Dave DuPree, who owns **Modern Kitchens & Baths** with his brother, Mike.

That's good news for area homeowners considering a kitchen or bath remodel. Even better news is the company's level of expertise.

"Our family has operated Modern Kitchens since 1950. As fourth generation owners, we stand 1000% behind the quality of our work and our company's

reputation. Mike and I are here every day working with homeowners," Dave said.

As trends change, so does the Manchester showroom. "We're always updating our showroom with new displays," Dave said. "Right now, we're installing a new kitchen and a new bath."

The showroom also has racks and racks of backsplash and floor tiles, cabinet and door samples, appliances and smart fixtures, hundreds of door handles and drawer pulls, and "every color of quartz."

Our Selection of quartz and granite countertops, including Cambria and Silestone, Dave said.

Because there are so many things to consider when designing a kitchen or bath, Dave suggests that homeowners visit the showroom with a photo of their existing space and an open mind.

"We'll sit down with them and discuss everything from design to installation. Our team has decades of experience and kitchens and baths are all they do," Dave said.

He noted that the company has an A+ rating with the Better Business Bureau.

"Our expertise and experience play into that but so does our commitment to customer service," Dave said. "Cleanliness is very important to us. My crews are very respectful of our client's homes. Perhaps that's not surprising. You don't get to 76 years in the business without doing things right."

Serving St. Louis since 1950
