

Restoring confidence with expert dental care

Matthew P. Cline, D.D.S. is well known for providing exceptional dental care. He has been named among the top dentists in St. Louis since 2016. His practice, now open in a new, larger office at 428 Old State Road in Ellisville, performs all aspects of dentistry, including implants, a process that becomes far easier for patients with the help of Dr. Cline's experienced clinical team.

Matthew Cline, D.D.S.

"We are unique in our ability to perform extractions, implant placement and implant restoration all in one place," Dr. Cline explained. "What makes us even more unique is our ability to offer a full mouth solution where teeth in poor condition can be removed and implants and full replacements placed in one day in our office. The latest digital and 3D printing technology makes this very convenient for our patients in need."

Every treatment plan is customized with the patient's needs, concerns and outcomes always at the forefront of the team's compassionate, professional and friendly care.

Dr. Cline and his team strive to provide an ideal dental experience by building relationships that result in confidence and beautiful patient smiles. During each patient's first visit, Dr. Cline examines and discusses the patient's dental needs and wishes. This comprehensive exam lays a strong foundation for all future visits.

As Dr. Cline explains, new technology applied to traditional services can mean fewer visits, quicker results and better outcomes. To learn how you and your family can benefit from personal, compassionate care and cutting edge technology, call Dr. Cline today.
