

Quality you can trust

Eureka Contracting & Roofing, LLC is a veteran owned business located in beautiful Eureka, Missouri. Their knowledgeable team brings over 60 years of experience in the construction and insurance industry, working as adjusters for insurance companies and contractors completing storm repairs.

Rick Hinkson, president, has over 30 years of experience in the construction and insurance industry. Working with some of the best and most skilled crews around, they can tackle almost any residential or commercial roof. They also do siding, fascia, soffit and gutters. Rick and his team promote preventative maintenance on roofs and encourage customers to call before they see water damage inside their home, business or church.

Eureka Contracting & Roofing understands insurance policies. With their extensive insurance knowledge, they can advise you on whether you should file a claim or not. It's important for homeowners to remember that a no pay claim is still considered a claim. They work with insurance companies not against them to get your needs met.

The company carries \$1 million liability and \$1 million workman's compensation insurance with a \$2 million aggregate.

In its commercial roof coating division, Eureka Contracting & Roofing can coat an existing roof with a 100% silicone product that will extend the life of an existing roof, promote lower energy bills and qualify for the EPA's Energy Star program, all for about 40% of the cost to replace the same roof.

Eureka Contracting & Roofing will inspect your roof, church, building or home with absolutely no costs or obligations. They will always look at your roof with your best interest in mind. Call the office at (636) 938-ROOF or Rick at (314) 614-0216.
